Befesa Presentation

ODDO BHF Forum 24th edition

7-12 January 2021

This presentation contains forward-looking statements and information relating to Befesa and its affiliates that are based on the beliefs of its management, including assumptions, opinions and views of Befesa and its affiliates as well as information cited from third party sources. Such statements reflect the current views of Befesa and its affiliates or of such third parties with respect to future events and are subject to risks, uncertainties and assumptions.

Many factors could cause the actual results, performance or achievements of Befesa and its affiliates to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others: changes in general economic, political, governmental and business conditions globally and in the countries in which Befesa and its affiliates do business; changes in interest rates; changes in inflation rates; changes in prices; changes to national and international laws and policies that support industrial waste recycling; legal challenges to regulations, subsidies and incentives that support industrial waste recycling; extensive governmental regulation in a number of different jurisdictions, including stringent environmental regulation; management of exposure to credit, interest rate, exchange rate and commodity price risks; acquisitions or investments in joint ventures with third parties; inability to obtain new sites and expand existing ones; failure to maintain safe work environments; effects of catastrophes, natural disasters, adverse weather conditions, unexpected geological or other physical conditions, or criminal or terrorist acts at one or more of our plants; insufficient insurance coverage and increases in insurance cost; loss of senior management and key personnel; unauthorised use of Befesa's intellectual property and claims of infringement by Befesa of others' intellectual property; Befesa's ability to generate cash to service its indebtedness changes in business strategy and various other factors. Should one or more of these risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or targeted.

Befesa and its affiliates do not assume any guarantee that the assumptions underlying forward-looking statements are free of errors nor do they accept any responsibility for the future accuracy of the opinions expressed herein or the actual occurrence of the forecasted developments. No representation (express or implied) is made as to, and no reliance should be placed on, any information, including projections, estimates, targets and opinions, contained herein, and no liability whatsoever is accepted as to any errors, omissions or misstatements contained herein or otherwise resulting, directly or indirectly, from the use of this document.

This presentation is intended for information only and should not be treated as investment advice. It is not intended as an offer for sale, or as a solicitation of an offer to purchase or subscribe to, any securities in any jurisdiction. Neither this presentation nor anything contained therein shall form the basis of, or be relied upon in connection with, any commitment or contract whatsoever. This presentation may not, at any time, be reproduced, distributed or published (in whole or in part) without prior written consent of Befesa.

Third quarter and first nine-month period 2020 figures contained in this presentation have not been audited or reviewed by external auditors.

This presentation includes Alternative Performance Measures (APM), including EBITDA, EBITDA margin, EBIT, EBIT margin, net debt and capital expenditures which are not measures of liquidity or financial performance under International Financial Reporting Standards (IFRS). EBITDA is defined as operating profit for the period (i.e. EBIT) before the impact of amortisation, depreciation, impairment and provisions. EBITDA margin is defined as EBITDA divided by revenue. EBIT is defined as Operating profit for the year. The Company uses EBIT to monitor its financial return after both operating expenses and a charge representing the cost of usage of both its property, plant and equipment and definite-life intangible assets. EBIT margin is defined as EBIT as a percentage of revenue. These non-IFRS measures should not be considered in isolation or as an alternative to results from operating activities, cash flow from operating, investing or financing activities, or other financial measures of Befesa's results of operations or liquidity derived in accordance with IFRS. Befesa believes that the APM included in this report are useful measures of its performance and liquidity. Other companies, including those in the industry in which Befesa operates, may calculate similarly titled financial measures differently than Befesa does. Because all companies do not calculate these financial measures in the same manner, Befesa's presentation of such financial measures may not be comparable to other similarly titled measures of other companies. These APM are not audited.

During Q3 Befesa improved results in ESG ratings and entered important sustainability index

- Befesa published the new Sustainability report in June 2020
- Based on more information and improved performance, ESG rating agencies updated their view
- In Q3 2020, Befesa received two upgrades:

Sustainalytics

Risk is measured and the score should be as low as possible: Befesa improved the score significantly by 6.7 to 14.8 points. New result: "Low Risk" (before: "Medium Risk")

ISS ESG

Befesa achieved the "Prime Status" and is now Industry Leader by being among the Top 3 companies out of more than 200 companies in the corresponding sector

- Befesa is part of the **Global Challenges Index (GCX)** since 18 September 2020
The GCX comprises a total of 50 international shares selected according to strict criteria from a total amount of around 6,000 companies worldwide.

Befesa Overview

Operational performance driven by continued resilient plant utilisation at around 80% in both core businesses despite COVID-19

- EAFD throughput of 161kt (-6% yoy)
- Salt slags & SPL recycled 103kt (-9% yoy)
- Secondary aluminium alloys of 44kt (up 14% yoy), increase driven by recovery in automotive sector and furnace upgrade at Barcelona plant

Metal prices moderately recovered qoq but still down yoy:

- Zinc LME Q3 €1,997 (-5% yoy); including zinc treatment charges (TC) → -11%⁽¹⁾ yoy combined price impact
- Alu Alloy prices Q3 €1,312 (-3% yoy)

- EBITDA at €29m (-21% / €-8m yoy) mainly driven by:

- (-) Unfavourable metal prices:
 - Zinc LME at €1,997/t (-5% yoy)
 - Zinc TC at \$300/t (+\$50/t yoy)
 - Aluminium alloy prices at €1,312/t (-3% yoy)

- (-) Lower volumes in Steel Dust Recycling Services

- (-) Salt Slags & SPL volumes (-9% yoy)

Partially offset by:

- (+) Positive volume & efficiency effects in Secondary Alu
- (+) Favourable zinc hedging offset LME price decrease

Continued strong and stable liquidity of €183m

- Strong cash position at €108m after paying €15m dividend in Q3; €75m RCF undrawn; Leverage at x3.3
- Operating cash flow at €93m LTM Q3

China construction progressing on schedule at both sites, Jiangsu & Henan

- Jiangsu: Completion of construction expected in Q1'21
- Henan: Construction progressing on schedule; Completion expected after the summer of 2021

ESG

- Sustainability and ISS ESG improved Befesa's rating
- Since 18 September 2020, Befesa is member of the Global Challenges Index (GCX)

(1) In 2020, the \$300 TC per tonne of WOX, divided by ~68% zinc content in WOX and divided by 85% zinc payable (after 15% free-metal deduction), is equivalent to ~\$519 per tonne of zinc payable; Similarly, in 2019, the \$245 TC per tonne of WOX is equivalent to ~\$424 per tonne of zinc payable.
