

Befesa has released the Sustainability Report 2018

Please find the following link to the Sustainability Report:

http://www.befesa.com/web/en/informacion_inversores/informes-presentaciones/index.html

We are pleased to publish the first Befesa Sustainability Report.

At Befesa, we are very proud of the contribution we make to environmental protection by recycling more than 1,500 thousand tonnes of hazardous waste/residues annually and producing more than 600 thousand tonnes of new raw materials reducing the consumption of natural resources. Beyond these facts, at Befesa we take strong responsibility for the environment, our employees and society.

For further questions, please contact the IR team of Befesa.
