

Are you looking for meaningful work and ready to put the circular economy into action?

With us you are not just doing a job - you are helping the environment and preserving our resources. Our employees are a key factor for the daily operations of Befesa as well as for the strategic development and future of the company.

Join our team as a **Mechanical Engineer - Projects** at **Befesa Zinc Metal** in Mooresboro, North Carolina, United States and start immediately.

Your role and tasks:

- Mechanical lead for capital and expense projects.
- Project management of maintenance and improvement projects.
- Co-ordinate activities between contractors and maintenance personnel in collaboration with the construction manager.
- Manage quality of deliverables, and effectively lead the mechanical project team.
- Creates technical mechanical specifications, prepares procurement inquiry packages, technically evaluates bids, and issues order packages for equipment.
- Coordinates review of vendor data/drawings, and supervises designers assigned to the project.
- Provides technical support and guidance on mechanical equipment, selections, installations, and their alternatives.
- Acting as a focal point for technical and work process related questions for EPC firms on outsourced projects.
- Monitoring and managing work hour estimates.
- Acting as focal point between Purchasing and project team on all questions and coordination of mechanical equipment issues.

Your profile:

- A minimum of a Bachelor's degree in Mechanical Engineering is required.

- A minimum of 5 years of experience in Mechanical Engineering is required.
- A minimum of 3 years of experience within chemical or similar industry is preferred.
- Prior experience with leading and supporting Capital or Expense Projects would be a plus.
- Experience with process piping design would be a plus.
- Professional Engineer registration is a plus.
