Business Update 2023

BofA Securities 2023 Global Metals, Mining & Steel

Disclaimer

This presentation contains forward-looking statements and information relating to Befesa and its affiliates that are based on the beliefs of its management, including assumptions, opinions and views of Befesa and its affiliates as well as information cited from third party sources. Such statements reflect the current views of Befesa and its affiliates or of such third parties with respect to future events and are subject to risks, uncertainties and assumptions.

Many factors could cause the actual results, performance or achievements of Befesa and its affiliates to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others: changes in general economic, political, governmental and business conditions globally and in the countries in which Befesa and its affiliates do business; changes in interest rates; changes in inflation rates; changes in prices; changes to national and international laws and policies that support industrial waste recycling; legal challenges to regulations, subsidies and incentives that support industrial waste recycling; extensive governmental regulation in a number of different jurisdictions, including stringent environmental regulation; management of exposure to credit, interest rate, exchange rate and commodity price risks; acquisitions or investments in joint ventures with third parties; inability to obtain new sites and expand existing ones; failure to maintain safe work environments; effects of catastrophes, natural disasters, adverse weather conditions, unexpected geological or other physical conditions, or criminal or terrorist acts at one or more of our plants; insufficient insurance coverage and increases in insurance cost; loss of senior management and key personnel; unauthorised use of Befesa's intellectual property and claims of infringement by Befesa of others' intellectual property; Befesa's ability to generate cash to service its indebtedness changes in business strategy and various other factors. Should one or more of these risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or targeted.

Befesa and its affiliates do not assume any guarantee that the assumptions underlying forward-looking statements are free of errors nor do they accept any responsibility for the future accuracy of the opinions expressed herein or the actual occurrence of the forecasted developments. No representation (express or implied) is made as to, and no reliance should be placed on, any information, including projections, estimates, targets and opinions, contained herein, and no liability whatsoever is accepted as to any errors, omissions or misstatements contained herein or otherwise resulting, directly or indirectly, from the use of this document.

This presentation is intended for information only and should not be treated as investment advice. It is not intended as an offer for sale, or as a solicitation of an offer to purchase or subscribe to, any securities in any jurisdiction. Neither this presentation nor anything contained therein shall form the basis of, or be relied upon in connection with, any commitment or contract whatsoever. This presentation may not, at any time, be reproduced, distributed or published (in whole or in part) without prior written consent of Befesa.

First quarter 2023 figures are unaudited.

This presentation includes Alternative Performance Measures (APM), including EBITDA, EBITDA margin, EBIT, EBIT margin, net debt and capital expenditures which are not measures of liquidity or financial performance under International Financial Reporting Standards (IFRS). EBITDA is defined as operating profit for the period (i.e. EBIT) before the impact of amortisation, depreciation, impairment and provisions. EBITDA margin is defined as EBITDA divided by revenue. EBIT is defined as Operating profit for the year. The Company uses EBIT to monitor its financial return after both operating expenses and a charge representing the cost of usage of both its property, plant and equipment and definite-life intangible assets. EBIT margin is defined as EBIT as a percentage of revenue. These non-IFRS measures should not be considered in isolation or as an alternative to results from operating activities, cash flow from operating, investing or financing activities, or other financial measures of Befesa's results of operations or liquidity derived in accordance with IFRS. Befesa believes that the APM included in this report are useful measures of its performance and liquidity. Other companies, including those in the industry in which Befesa operates, may calculate similarly titled financial measures differently than Befesa does. Because all companies do not calculate these financial measures in the same manner, Befesa's presentation of such financial measures may not be comparable to other similarly titled measures of other companies. These APM are not audited.

Executive summary

- Revenue increased by 23% to €322m (Q1'22: €261m) driven by the US operations

- Adj. EBITDA at €50.1m, approx. stable qoq (Q4'22: €50.7m); -18% yoy (Q1'22: €61.1m); lower zinc LME prices, unfavourable 19% higher TC and continued coke inflation
- **Operating cash flow at €13m** (Q1'22: €26m), approx. stable yoy normalised for final Hanover fire insurance proceeds, expected Q2; Cash at €143m provides >€200m liquidity

2023 guidance of €200m to €230m EBITDA, -7% to +7% yoy (2022: €215m); Proposing **stable dividend** of **€1.25 per share** for 2023 (2022: €1.25)

Integrating & ramping up zinc refining operations acquired on 30 September; Continuing efficiency projects to improve earnings going forward, refurbishing Palmerton

Henan plant: Ramping up; Two plants operating in 2023; Working on the third province, Guangdong

Q1 business highlights

Steel Dust

- EAFD throughput: -19% yoy to 274 kt, -8% qoq, mainly due to Turkey operations impacted by earthquake (restarted in March), and the US
- Plant utilisation: 71%
- Zinc LME prices: -13% yoy, -1% qoq
- Adj. EBITDA: €37m, -32% yoy, stable qoq

Alu Salt Slags

- Salt slags & SPL volumes: -6% yoy to 82 kt, stable qoq
- 2nd aluminium alloys:
 +3% yoy to 44 kt, +13% qoq
- Plant utilisation: 71% (>90% normalised for Hanover, ramping up)
- Alu FMB prices: -12% yoy, -0.5% qoq
- Adj. EBITDA: +82% to €14m, +17% qoq

US

- Integrating & ramping up zinc refining asset acquired on 30 September
- Executing efficiency projects, preparing Palmerton plant refurbishment

China

- · Henan: Ramping up operations
- Operating Jiangsu & Henan plants in 2023
- Working on Guangdong as third province

✓ US Zinc refining asset acquired on 30 Sep 2022; Integration progressing, ramping up operations

Rutherford County, NC

Special High Grade (SHG) zinc production capacity

Zinc refining plant centrally located amongst Befesa's EAFD recycling plants close to the major US EAF steel mini mills

- Acquired remaining 93% of zinc refining asset on 30 September 2022 for \$47m cash transaction; 65% or \$88m below original purchase option of \$135m
- Attractive multiple of around 5x Adj. EBITDA and at about 1/10th of >\$500m invested
- Long-term view around asset potential unchanged;
 Opportunity to improve performance of the plant further, especially post current high inflation environment
- Size of refining plant sufficient to process zinc
 Waelz oxide (WOX) of up to 220 kt of all 4 recycling assets at full capacity to pure zinc
- Largest producer of "green zinc" (SHG) 100% from recycled materials (WOX) using solvent extraction

Refurbishing Palmerton in 2023/24 to drive efficiencies & increase capacity utilisation by 2026

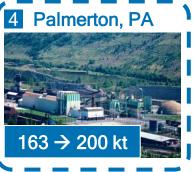

Palmerton refurbishment status update

- Engineering / design across 6 working areas (packages) in process
- Request For Quote with suppliers started; Completion scheduled for Q2 2023
- Scheduling downtimes across production lines ensuring continuation of customer service

x EAFD annual nameplate recycling capacity

Operating 2 plants in 2023; Preparing 3rd province, Guangdong

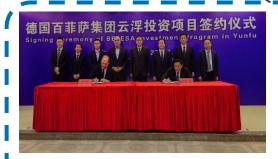

China II, Xuchang (Henan)

- ✓ Commissioning completed Dec 2022
- ✓ Inaugurated on 23 February 2023
- Ramping up operations

China I, Changzhou (Jiangsu) ✓ Ramped up Q1 2022

BEFESA

China III, Yunfu (Guangdong)

- ✓ LOI signed in Q4 2022
- ✓ Signed investment agreement with local authorities on 22 February
- > Land lot assigned; Preparation works in progress (levelling lot)
- Preparing basic engineering
- Starting negotiations with local steelmakers

Befesa's EAFD recycling sites

EAFD generation - Chinese market

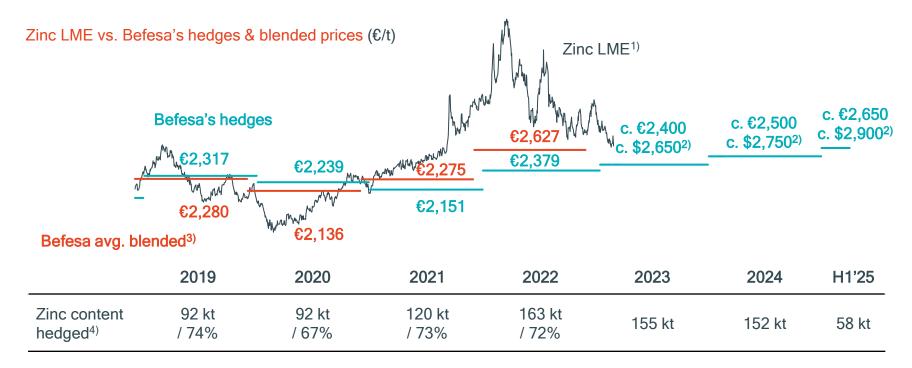

8 Business Update - Post Q1 2023 Earnings

Outlook 2023

	Lower-end: €200m -€15m / -7% yoy	Upper-end: €230m +€15m / +7% yoy			
	 Lower end: Continued c. €50m per quarter run-rate; Coke prices remain high; Zinc prices c. \$2,800-2,900/t rest of the year 				
EBITDA	 Upper-end: Coke prices reducing to H1'22 levels; China momentum accelerates; Zinc prices strengthen in H2 				
	Key EBITDA sensitivities:				
	+/- €100/t Zinc LME price +/- €100/t Aluminium FMB price	Steel +/-€8 to 9m -	Alu Salt Slags - +/-€1.5 to 2m		
Capex	 Total capex of c. €85-95m: c. €20m growth (US Palmerton refurbishment) c. €65-75m regular maintenance / US operational excellence / IT / Compliance 				
Dividend	 Proposing yoy stable dividend distribution of €50m (€1.25 per share) 				
Cash flow, cash position & net leverage	 c€40m to -€50m cash flow¹⁾ c. €110-120m cash position Net leverage at around x2.9 	 c€15m to -€25m cash flow¹⁾ c. €135-145m cash position Net leverage at around x2.5 			

Zinc prices & hedging strategy

Hedge book extended further up to July 2025, c. 2 years; Improving earnings & cash flows visibility

BEFESA Hedging strategy unchanged

1-3 years forward	Targeting 60% to 75% of zinc equivalent volume	Befesa providing no collateral
-------------------	---	-----------------------------------

BEFESA

1) London Metal Exchange (LME) zinc daily cash settlement prices

2) Assumes FX \$/€ of 1.10 for 2023, 2024, and 2025

10

3) Zinc blended prices are averages computed based on the monthly effective LME zinc and hedging prices weighted with the respective hedged and non-hedged volumes 4) As percentage of total zinc payable output

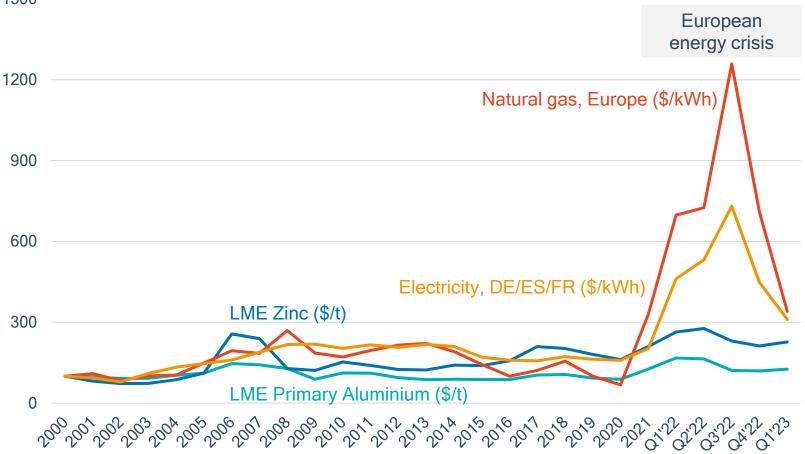

Business Update - Post Q1 2023 Earnings

Zinc & alu metal prices directly correlated with electricity & gas prices over the last >20 years

Indexed annual price trend¹⁾, 2000 to Q1 2023 (Index, 2000 = 100)

(Index, 2000 = 100)

1500

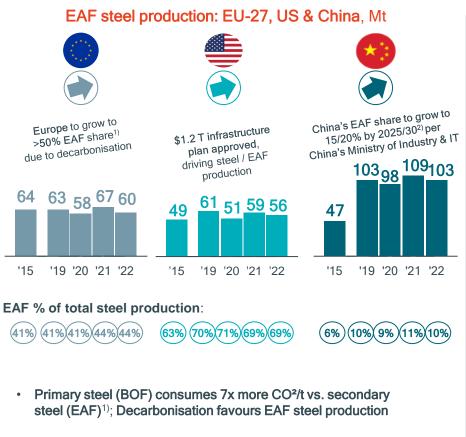

1) Natural gas, LME Aluminium & Zinc historical trend, 2000-2021, are average real prices from World Bank Commodity Price Data (The Pink Sheet); 2000-2021 electricity prices are annual average of Germany, Spain & France for medium consumers (consuming 2,000 - 19,999 MWh per annum) excluding VAT and other recoverable taxes and levies; 2022 prices: Natural gas prices are monthly average of Dutch TTF closing prices; Electricity prices are monthly average of Germany, Spain & France for settlement prices quoted on the London Metal Exchange

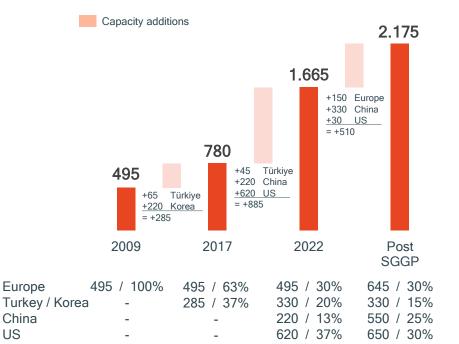

EAF steel production -&-Befesa's steel portfolio growth & diversification

Befesa growing and diversifying its portfolio to capture Europe, the US and China addressable markets

 Each tonne of steel through EAF vs. BOF → saves 1.5 t CO₂, 1.4 t iron ore, 740 kg coal & 120 kg limestone³⁾

Befesa's EAFD recycling capacity trend, kt

• Befesa Steel portfolio growing @ c. 6% CAGR (around twice GDP) ...

... while diversifying to a well-balanced Europe / Asia / US footprint

Sources: Worldsteel; Company data; IEA; S&P Global Commodity Insights

1) Net Zero by 2050 (IEA, May 2021), Green Steel for Europe Consortium (June 2021) 2) S&P Global Commodity Insights (April 2022) 3) Bank of America Research (November 2022)

12

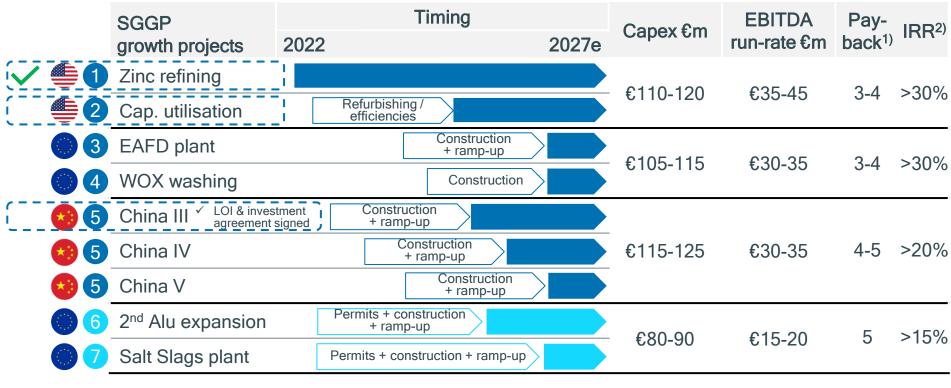

13 Business Update - Post Q1 2023 Earnings

SGGP indicative timeline; Befesa in control; Adjusting timing to macroeconomic developments

€410-450m total capex requirement over the next five years

Steel Dust

€410-450 €110-135 3-4 >20%

BEFESA

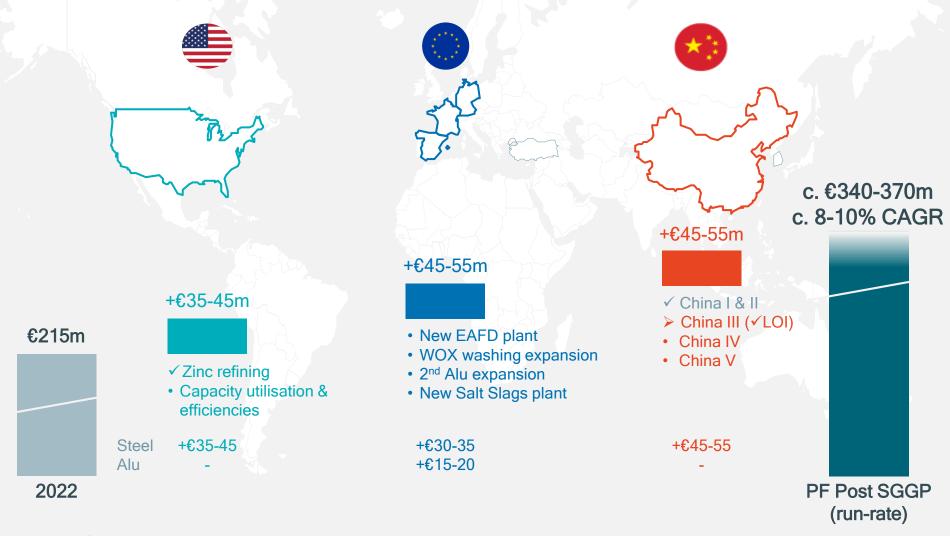

Note: €360-400m post c. €50m invested in US zinc refining acquisition

1) Payback calculated dividing total capex by run-rate EBITDA

2) IRR estimated based on incremental EBITDA less WC & taxes to Operating cash flow contribution vs. growth & maintenance capex, discounted at an 8% WACC

14 Business Update - Post Q1 2023 Earnings

Well defined growth roadmap driving +€125-155m EBITDA growth, 8-10% CAGR, globally balanced, c. 1/3 US/EU/Asia

Committing to growth through the cycle

Strong financial backbone and high cash flow generation allows to self-fund SGGP

Targeting to continue dividend distribution at 40-50% of net profit

Prudent risk and liquidity management; Modular SGGP growth initiatives timing in control of Befesa

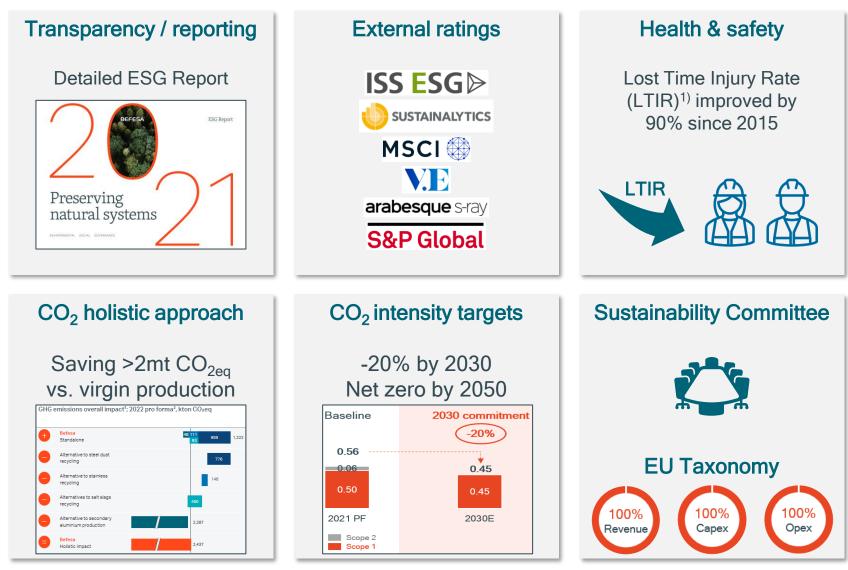

Investing in core businesses; Low risk and high returns, at 3-5 years payback and >20% IRR

Integrate SGGP into annual guidance & budget process

ESG: Enhanced transparency & performance

1) Befesa's own employees and contractors 17 Business Update - Post Q1 2023 Earnings

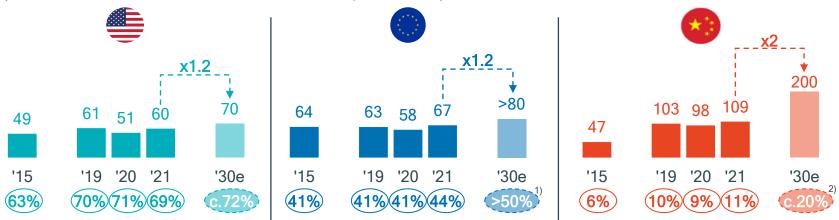

02 Sustainable Global Growth Plan (SGGP), 2022-2027

Megatrends and Befesa's approach by market

EAF steel production

(million tonnes, EAF % share of total steel production)

Primary steel (BOF) consumes 7x more CO²/t vs. secondary steel (EAF)¹; Decarbonisation favours EAF steel production

Each tonne of steel through EAF vs. BOF \rightarrow saves 1.5 t CO₂, 1.4 t iron ore, 740 kg coal & 120 kg limestone³

- Approved \$1.2 T infrastructure plan requires more steel output, from '24/25 onwards; Plus, new announced EAF capacity driving EAF share >70%
- Shortage of zinc smelting

Befesa approach:

 > c.40-50% market share in EAFD; Improving asset efficiency ahead of higher volume 2024/25 onwards
 → Load assets & maintain share

- Replacing BOF with EAF essential for steelmakers to achieve CO₂ targets; EAF share growing to >50%
- EV transition drives alu demand up & OEMs with preference for recycled alu

Befesa approach:

c.40-50% market share in EAFD & Alu
 Salt Slags, and high-cap. utilisation;
 Invest in new cap. & maintain share

- Government's masterplan demands
 doubling EAF share to c.20% by 2030²)
- Regulation launched 2016/17;
 Befesa is 1st mover and market leader in largest & new EAFD market

Befesa approach:

 Continue capacity expansion step by step, monitor recovery from COVID; Planning for 15-20% market share

Sources: Worldsteel; Company data; IEA; S&P Global Commodity Insights

1) Net Zero by 2050 (IEA, May 2021), Green Steel for Europe Consortium (June 2021) 2) S&P Global Commodity Insights (April 2022) 3) Bank of America Research (November 2022)

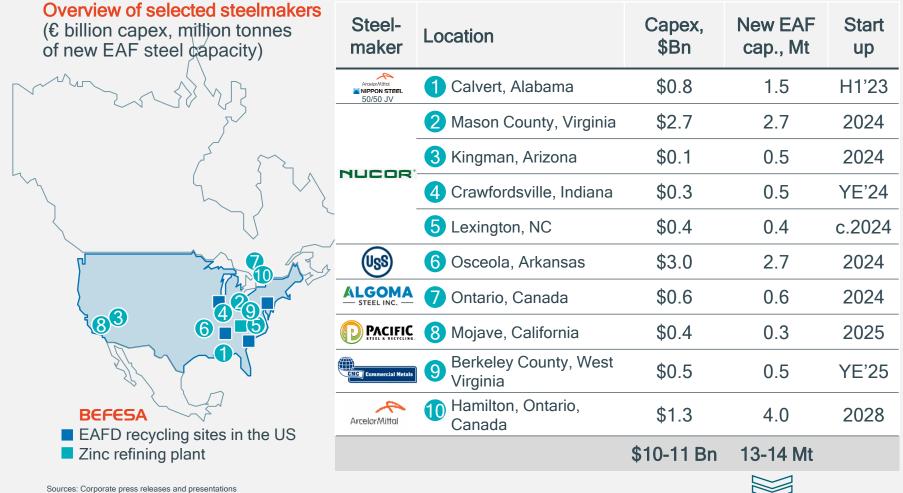

>300 kt EAFD

Decarbonisation investments & Infrastructure Programme will support EAF growth by 2030

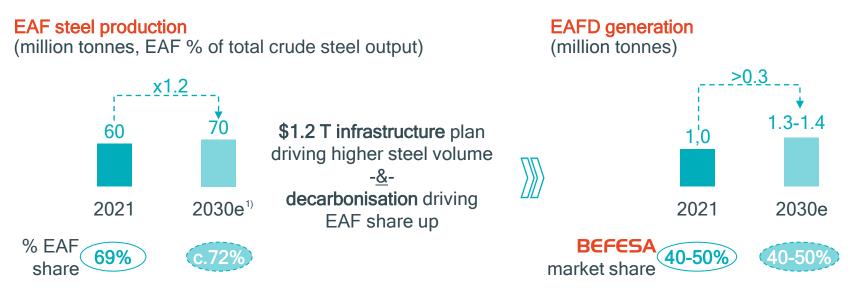

c.\$10-11 Bn capex equal to c.13-14 Mt EAF announced; Plus, \$1.2 T infrastructure plan requires more steel overall in the US \rightarrow generating >300 kt incremental EAFD

20 / Business Update - Post Q1 2023 Earnings

SGGP – Steel Dust – US

EAFD generation in the US expected to increase >0.3 Mt by 2030 ... Befesa to fully utilise existing c.620 kt annual installed capacity

Befesa's expansion projects

- ✓ Acquisition of Zinc refining asset on 30 Sep '22 for \$47m cash transaction
- Executing capacity utilisation increase in 2023-26;
 - Targeting c.200 kt incremental throughput to fully utilise existing c.620 kt nameplate capacity
 - Refurbishing Palmerton site in 2023-24, to be ready for expected volume increase in '24-26 onwards
 - Efficiencies & refurbishment vital to achieve throughput, energy & CO₂ intensity improvements

c. €110-120m total investment; c. €35-45m total incremental EBITDA p.a.; Low-risk & high-return projects

✓ US Zinc refining asset acquired on 30 Sep 2022

Rutherford County, NC

Special High Grade (SHG) zinc production capacity

Zinc refining plant centrally located amongst Befesa's EAFD recycling plants close to the major US EAF steel mini mills

- Acquired remaining 93% of zinc refining asset on 30 September 2022 for \$47m cash transaction; 65% or \$88m below original purchase option of \$135m
- Attractive multiple of around 5x Adj. EBITDA and at about 1/10th of >\$500m invested
- Long-term view around asset potential unchanged;
 Opportunity to improve performance of the plant further, especially post current high inflation environment
- Size of refining plant sufficient to process zinc
 Waelz oxide (WOX) of up to 220 kt of all 4 recycling assets at full capacity to pure zinc
- Largest producer of "green zinc" (SHG) 100% from recycled materials (WOX) using solvent extraction

Refurbishing Palmerton in 2023/24 to drive efficiencies & increase capacity utilisation by 2026

142 kt

EAFD annual nameplate recycling capacity

Palmerton refurbishment status update

- Engineering / design across 6 working areas (packages) in process
- Request For Quote with suppliers started; Completion scheduled for Q2 2023
- Scheduling downtimes across production lines ensuring continuation of customer service

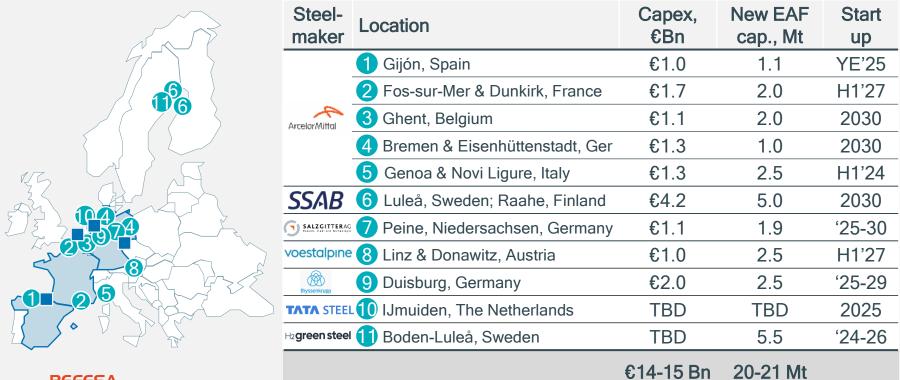

Accelerating decarbonisation investments in EU will support EAF share growing to >50% by 2030

c. \pounds 14-15 Bn investments in new steel EAF projects in Europe announced ... Representing c.20-21 Mt incremental steel EAF capacity \rightarrow generating c.350 kt EAFD

Overview of selected steelmakers

(€ billion capex, million tonnes of new EAF steel production capacity)

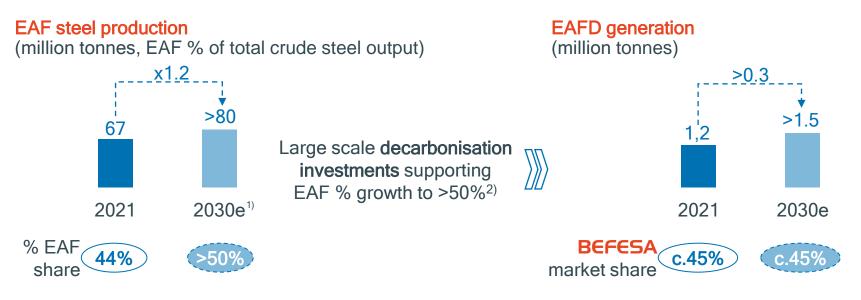

SGGP – Steel Dust – Europe

EAFD generation in Europe expected to increase >0.3 Mt by 2030 ... Befesa adding 140-160 kt new EAFD recycling capacity to maintain its current c.45% market share

Befesa's expansion projects

- Grow with EAFD market & invest in new state-of-the-art EAFD recycling capacity; 140-160 kt incremental EAFD capacity
- Expand WOX washing capacity in line with incremental EAFD volume

c. €105-115m total investment; c. €30-35m total incremental EBITDA p.a.; Low-risk & high-return projects

Adding new EAFD recycling capacity –and–WOX washing expansion

c.€105-115m total investment; c.€30-35m total incremental EBITDA p.a.; Low-risk & high-return projects

New EAFD recycling plant

- Grow with EAFD addressable market and invest in a new 140-160 kt state-of-the-art EAFD plant
- Construction + ramp-up in 2025-26; Operational by 2026-27
- Low-risk & high-return project

WOX washing expansion

- Expand WOX washing capacity at Gravelines, France, in line with incremental European EAFD capacity
- Construction + ramp-up in 2025-26; **Operational by 2026-27**
- Investment required to enable EAFD capacity growth

Largest producer of steel, rapidly transitioning from BOF to EAF; a strong growth opportunity

>60 Mt new EAF capacity announced, representing c.1 Mt EAFD incremental generation; Befesa strategically located in provinces with high EAFD generation

EAFD generation - Chinese market

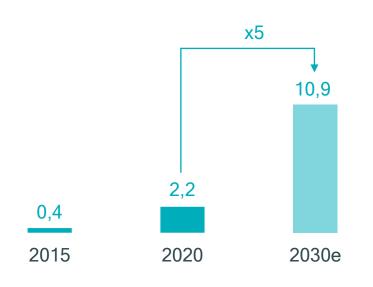

30 Business Update - Post Q1 2023 Earnings

Decarbonisation trend drives transition to Electric Vehicles (EV)

Automotive industry switching from combustion to EV

EV unit sales in Europe¹⁾ (million units)

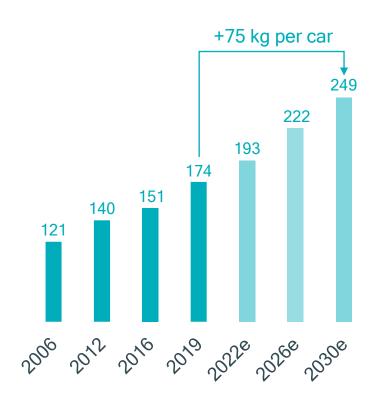

- EU approved plan to ban sales of vehicles with combustion engines (ICE) by 2035²⁾
- EV unit sales forecasted to grow x5 from c.2 million in 2020 to >10 million by 2030
- EV cars requiring light-weight construction, favouring aluminium demand

EV requiring higher aluminium content per car to achieve light-weight targets

Average aluminium content per vehicle¹⁾, net weight (kg per passenger car)

- Average aluminium content per vehicle (passenger cars) has steadily been increasing, from 121 kg/car in 2006 to 193 kg/car in 2022
- Growing and mandatory electrification requires light-weighting construction and drives growing demand for aluminium
- Aluminium content per vehicle expected to accelerate to 249 kg/car by 2030

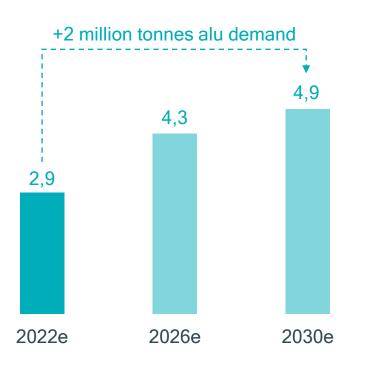

... driving higher aluminium demand with increased needs for 2nd alu & salt slags recycling

Aluminium demand from Auto¹⁾ in Europe, net weight

(million tonnes)

- Automotive aluminium demand will continue to grow to address light-weighting needs
- OEMs aim to reduce their carbon footprint through use of recycled metal
- Requiring increased production of secondary aluminium and salt slags recycling volumes
- Expecting incremental >300 kt salt slags generation in Europe by 2030
- Befesa's salt slags recycling market share is c.45%; Adding recycling capacity to maintain leadership market share

Expansion of 2nd Aluminium –and– New Salt Slags recycling plant

Expansion of 2nd Aluminium

- Expand 2nd aluminium production capacity by c.90 kt at existing site (Bernburg) in line with expected volume
- Permits + construction + ramp-up: 2023-25;
 Operational by 2026
- Low-risk & medium-return project

Befesa's expansion projects

- New Salt Slags recycling plant
- Invest in a new c.120 kt state-of-the-art salt slags recycling plant in line with incremental secondary aluminium capacity
- Permits + construction + ramp-up: 2023-26;
 Operational by 2026-27
- Low-risk & medium-return project

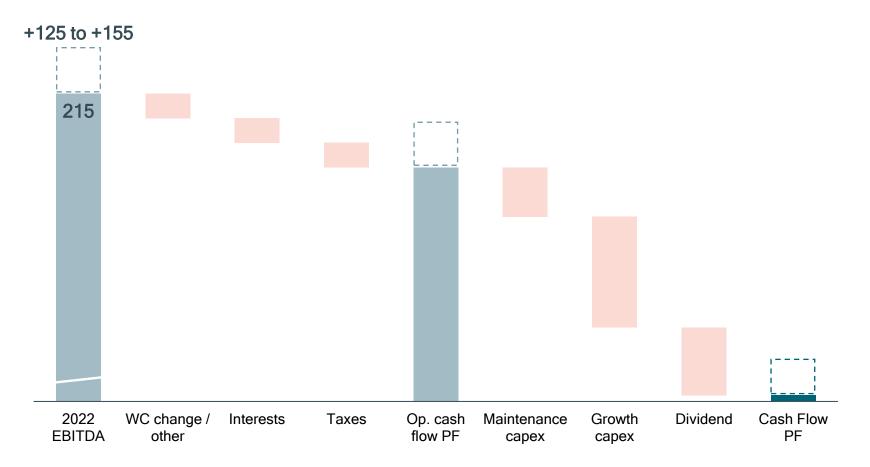

- Expansion of 2nd Aluminium will increase capacity from existing 205 kt to c.295 kt
- New Salt Slags recycling plant will increase capacity from existing 450 kt to c.570 kt

c.€80-90m total investment; +€15-20m total incremental EBITDA p.a.; Low-risk & medium-return projects

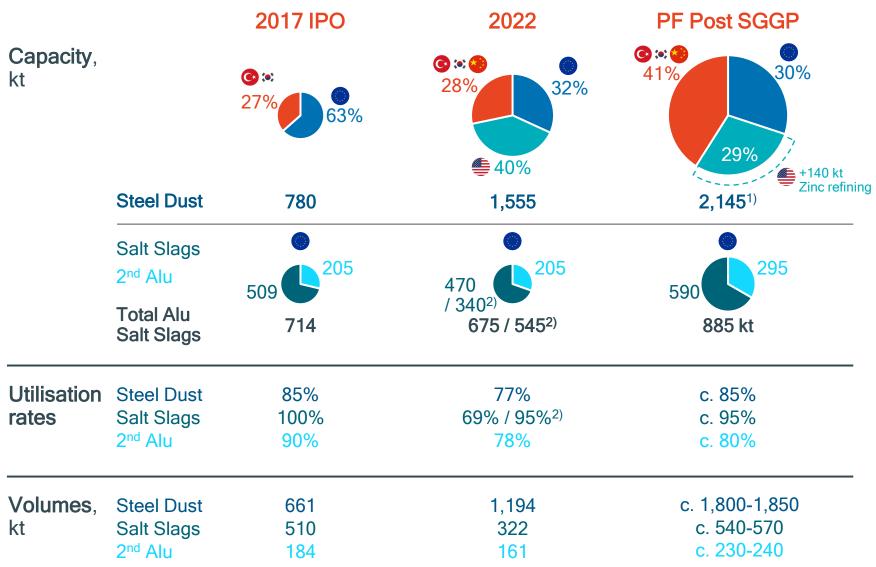

Befesa can self-fund SGGP while keeping leverage c. x2.5 -&- distributing dividends

EBITDA to Cash flow management walk, Illustrative conceptual annual view within SGGP period (€m)

Diversifying Befesa's global footprint ...

1) 2,145 kt Steel Dust capacity excludes 140 kt from Zinc Refining; 2) Normalised for 130 kt Hanover installed capacity due to plant shutdown in 2022 36 / Business Update - Post Q1 2023 Earnings

... core-business focus drives portfolio growth

Consolidated key financials

Q1 adjusted EBITDA at €50.1m, approx. stable qoq with Q4'22 at €50.7m; -18% yoy, mainly due to lower zinc prices incl. unfavourable TC partially offset with stronger aluminium margins, and lower volumes incl. Turkey earthquake

Adjusted EBITDA bridge Q1 2022 to Q1 2023 (€m)

	<i>-€11.0 / -18.0%</i>

39 Business Update - Post Q1 2023 Earnings

Steel Dust Recycling Services

Q1 EBITDA at €37.0m, approx. stable qoq with Q4'22 at €37.6m; -32% yoy, mainly due to lower zinc prices incl. unfavourable TC at \$274/t (+19% yoy), continued record high coke prices (+6% qoq, +41% yoy) and lower EAFD volumes

EBITDA bridge Q1 2022 to Q1 2023 (€m)

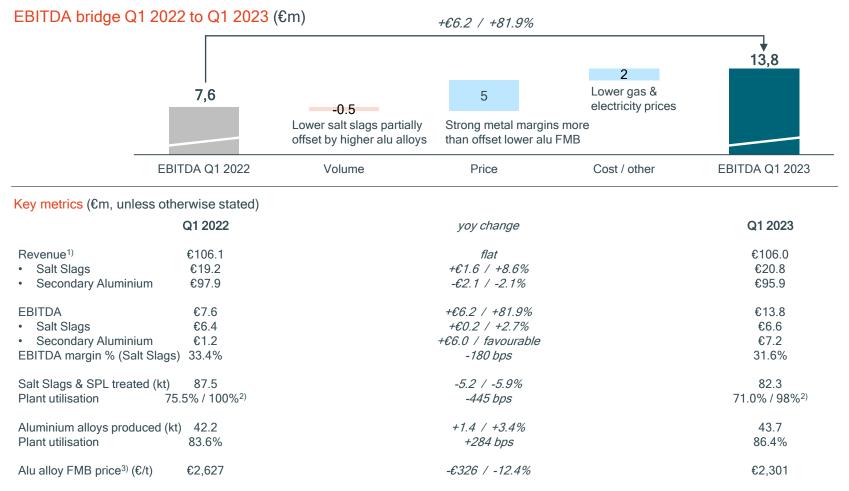

2) Blended rate between hedged prices and average spot prices, weighted by the respective hedged and non-hedged volumes, reflecting the effective price to Befesa

Aluminium Salt Slags Recycling Services

Q1 EBITDA at €13.8m, up €2m qoq from Q4'22 at €11.8m; up €6m or 82% yoy; mainly due to strong aluminium metal margins and lower gas and electricity prices

1) Total revenue is after intersegment eliminations (Q1 2022: €11.1m; Q1 2023: €10.6m)

2) Normalising for Hanover plant shutdown

3) Aluminium scrap and foundry ingots aluminium pressure diecasting ingot DIN226/A380 European Metal Bulletin free market duty paid delivered works

Cash flow, net debt & leverage

Cash on hand at €143m providing >€200m liquidity; Net leverage of x2.81

Adjusted EBITDA to total cash flow (€m)

1) Includes investments required to maintain or replace assets as well as those related to productivity, compliance and IT

Mainly includes cash bank inflows/outflows from bank borrowings and other liabilities, as well as the effect of foreign exchange rate changes on cash
 LTM figures

4) Net leverage calculated as Net debt over Adjusted EBITDA.

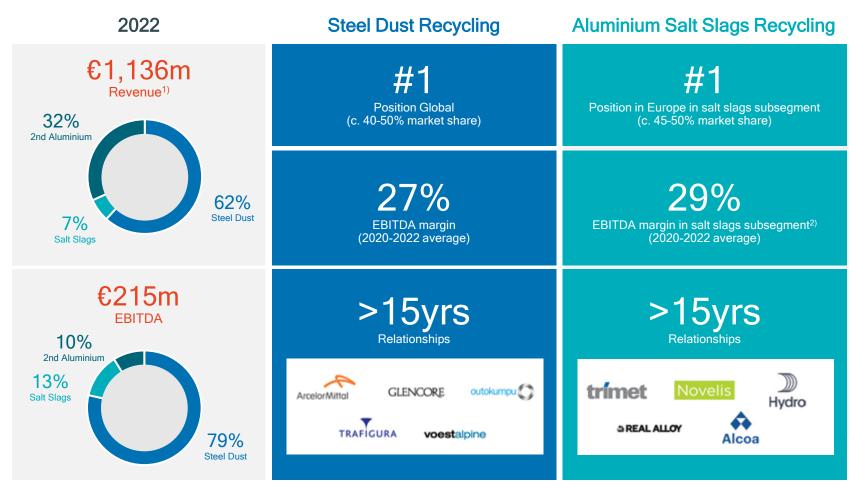

Befesa at a glance

Global leader in Europe, the US and Asia in providing regulated critical hazardous waste recycling services to the steel and aluminium industries

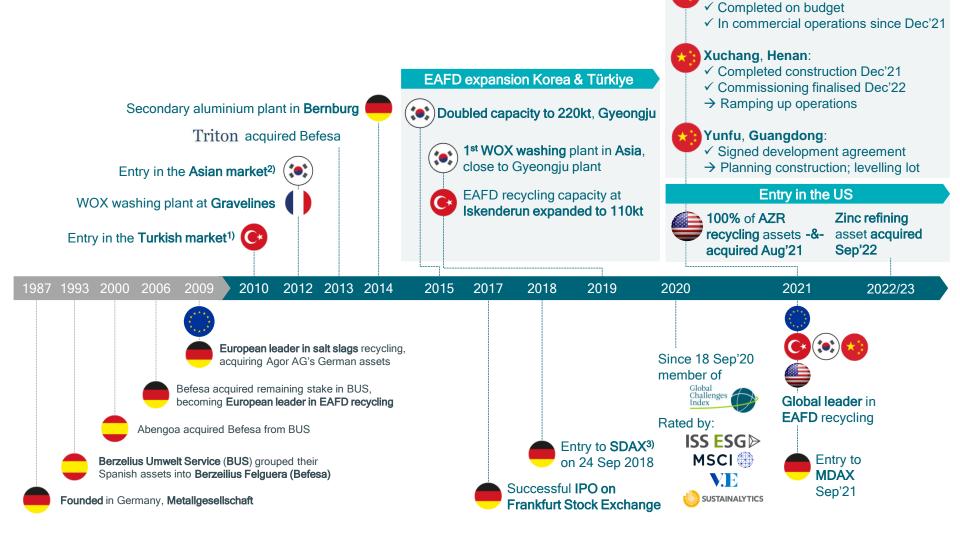

Excluding internal revenue; revenue split is calculated on revenues including internal revenue
 Including recycling of SPL (a hazardous waste generated in primary aluminium production)

Key milestones

Befesa has grown successfully through organic initiatives and acquisitions

1) Through 51/49 JV with Canadian Silvermet; 2) By acquiring subsequent stakes in the Korean Hankook; 3) Free-float at 100% after Triton's exit on 6 June 2019

45 Business Update - Post Q1 2023 Earnings

EAFD expansion China

First to market with state-of-the-art EAFD recycling plants in **China**:

Changzhou, Jiangsu:

Leader in circular economy for >30 years

Environmental regulations

getting stricter and expanding into new geographies; enforcing recycling to drive resource efficiency and lower carbon footprint

Recycling service solutions

critical to the steel and aluminium industries; long-term service relationships with strong barriers to entry and high captive demand

Proven track record

to grow and diversify Befesa's portfolio; developing markets as industry leader & first mover; resilient through the cycles

Global leader

with balanced footprint, close to clients, in Europe, the US & Asia, applying state-of-the-art technology

Favourable mega trends

Decarbonisation, Electric Vehicles (EV), circular economy, drive secondary steel & aluminium demand → requiring Befesa's recycling services

Strong financial backbone

Long-term capital structure & prudent hedging approach enable stable cash flows to fund growth SGGP roadmap

Experienced & stable team

focused on customer service, ESG, profitable and sustainable growth

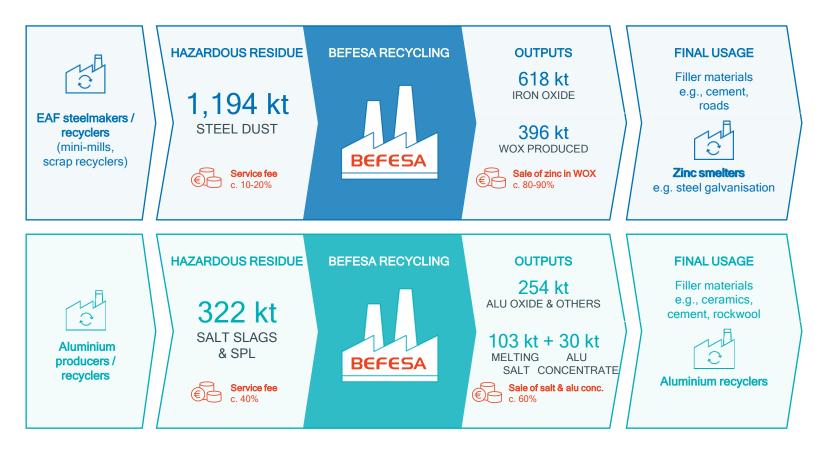

Shareholder returns

through consistent dividend distribution and high returns on expansion projects

Highly regulated & critical service model

Befesa is the leading environmental services partner in the circular economy of the 2nd steel and aluminium industry by recycling and avoiding the landfilling of c. 1.8 Mt hazardous residues and recovering > 1.5 Mt of new valuable materials

All figures are of the year 2022

Value chains are simplified and only reflect Befesa's core business segments (i.e. Steel Dust; Aluminium Salt Slags):

- Within Steel Dust Recycling Services business segment Befesa manages a Stainless sub-segment (90 kt stainless-steel dust throughput in 2022)

- Within Aluminium Salt Slags Recycling Services business segment Befesa manages a Secondary Aluminium sub-segment (161 kt secondary aluminium alloys produced in 2022)

Proven resilience & growth through cycles

Attractive growth track record with proven margin resilience despite volatile environment - driven by a successful service-focused business model & prudent financial practices

Befesa's resilience during latest crises

Befesa has demonstrated resilient volumes and capacity utilisation levels during the latest crises

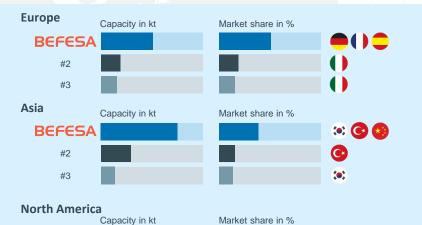

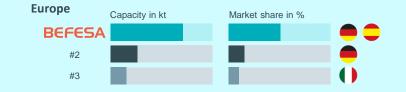

Global leader in Europe, North America & Asia

EAFD recycling plants Befesa is the global leader in steel dust and the European leader in salt slags recycling services with a competitive advantage due to its close-proximity to key clients; 24 plants globally Salt slags & SPL recycling plants Clients Lünen Duisbura Hanover Fouquières-lès-Lens¹⁾ Freiberg 🔁 Jiangsu & Henan²⁾ Calumet, IL Asúa-Erandio Palmerton, PA Valladolid Barnwell, SC Iskenderun Gyeongju Rockwood, TN

ALU SALT SLAGS RECYCLING

Note: Footprint reflects only Befesa's core recycling services - Steel Dust and Salt Slags & SPL

1) 50/50 joint venture with Recylex

BEFESA

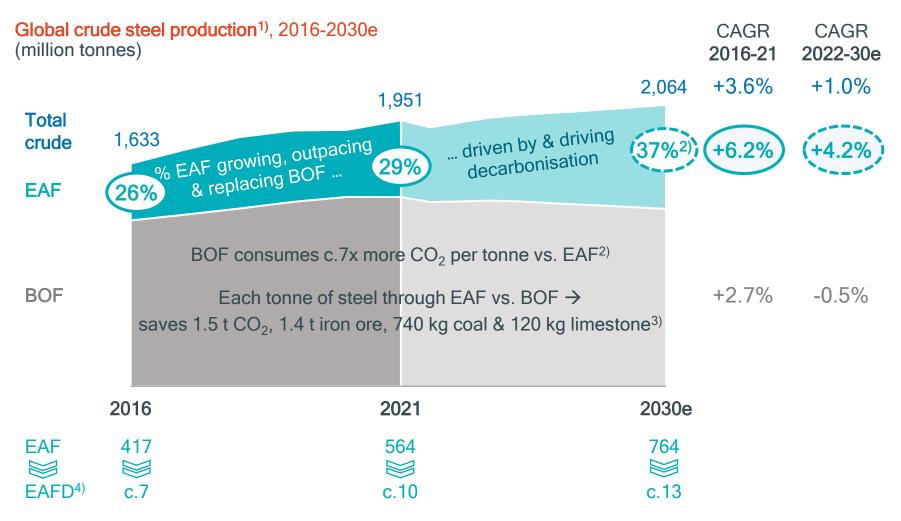

#2 #3

2) Changzhou, Jiangsu province: In commercial production and selling WOX since Dec 21; Monitoring recovery from COVID

Xuchang, Henan province: Completed construction Dec'21 on budget; Commissioning prolonged due to COVID, finalised in Dec'22 and ramping up operations

•

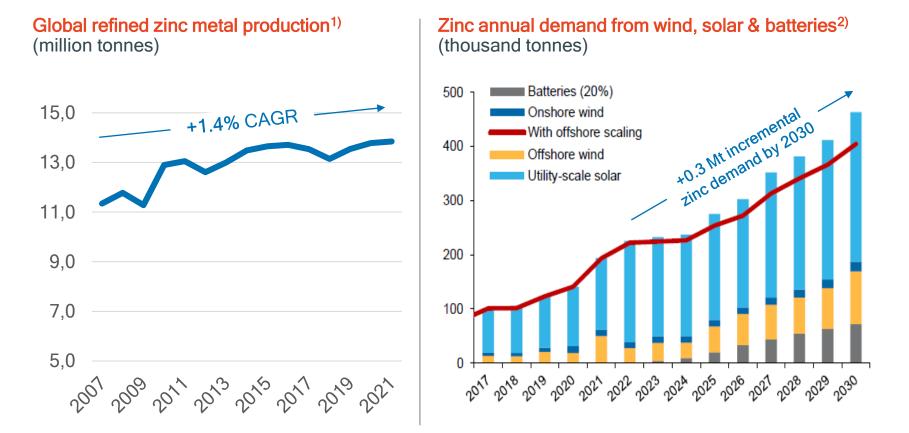

Decarbonisation megatrend favouring & driving EAF steel growth

1) 2016-21 actuals from Worldsteel; 2022-2030e from "Steel - Eye of the Storm", Morgan Stanley (Sep 2022); 2) "Net Zero by 2050: A Roadmap for the Global Energy Sector", IEA (May 2021); Green Steel for Europe Consortium (June 2021) 3) Bank of America Research (November 2022); 4) Total EAFD addressable market based on the assumed mid-point 17.5kg EAFD generation per tonne of EAF steel output

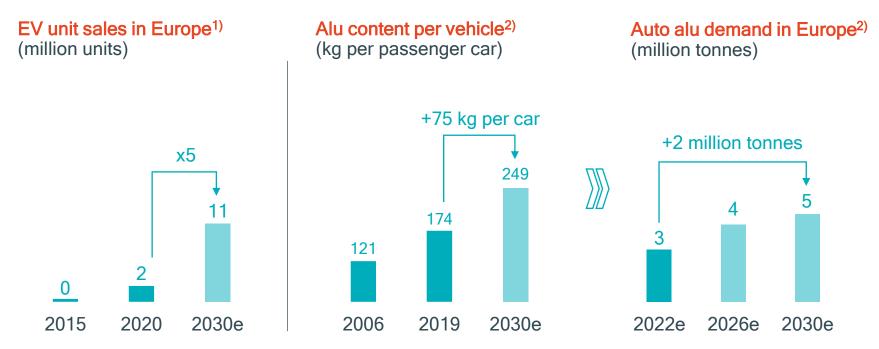

Zinc global production grew at 1.4% CAGR over L15 years; Incremental demand from transition to renewable energy

WOX, mixed with virgin zinc concentrates, preferred by smelters, is <5% of global zinc available; Befesa continues to be sold out

Decarbonisation and EV driving aluminium market growth in Europe

- Decarbonisation trend drives transition to Electric Vehicles (EV)
- EV requiring higher aluminium content per car to achieve light-weight targets
- ... driving higher aluminium demand in Europe and increased need for secondary aluminium and salt slags recycling capacity

Strong financial backbone

Long-term and efficient capital structure with no maturities up to Jul'26

> Prudent zinc hedging approach

- \rightarrow Stable & high liquidity
- → Moderate leverage at c.x2.5

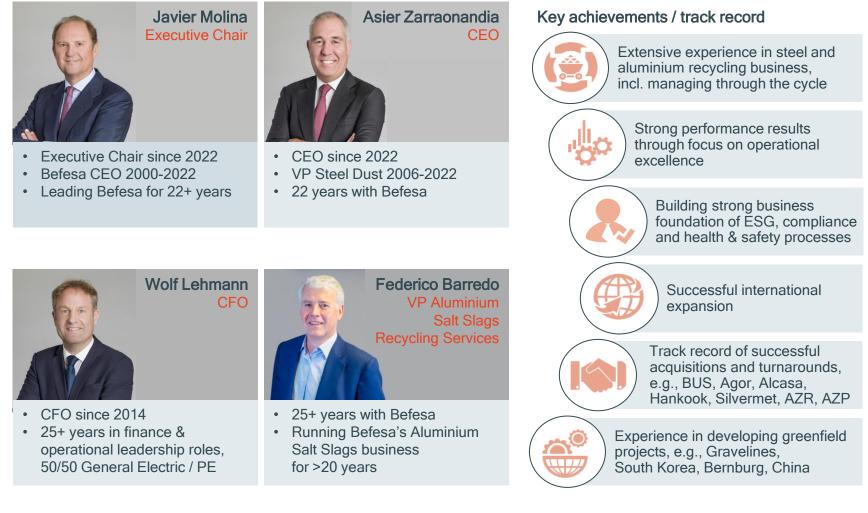

Rigorous cash management

... to **self-fund** growth roadmap in the **US**, **Europe** & Asia

Experienced & stable management team

Senior management team delivering results through long-standing industry expertise, entrepreneurial spirit and focus on operational excellence as well as governance and compliance processes

ESG highlights

Lost Time Injury Rate (LTIR)¹⁾

Key player within the circular economy, with c. 1.8 Mt recycled and c. 1.5 Mt of valuable materials; LTIR further reduced by >30% yoy to new low of 0.55
