Kepler Cheuvreux 4th ESG Conference

Disclaimer

This presentation contains forward-looking statements and information relating to Befesa and its affiliates that are based on the beliefs of its management, including assumptions, opinions and views of Befesa and its affiliates as well as information cited from third party sources. Such statements reflect the current views of Befesa and its affiliates or of such third parties with respect to future events and are subject to risks, uncertainties and assumptions.

Many factors could cause the actual results, performance or achievements of Befesa and its affiliates to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others: changes in general economic, political, governmental and business conditions globally and in the countries in which Befesa and its affiliates do business; changes in interest rates; changes in inflation rates; changes in prices; changes to national and international laws and policies that support industrial waste recycling; legal challenges to regulations, subsidies and incentives that support industrial waste recycling; extensive governmental regulation in a number of different jurisdictions, including stringent environmental regulation; management of exposure to credit, interest rate, exchange rate and commodity price risks; acquisitions or investments in joint ventures with third parties; inability to obtain new sites and expand existing ones; failure to maintain safe work environments; effects of catastrophes, natural disasters, adverse weather conditions, unexpected geological or other physical conditions, or criminal or terrorist acts at one or more of our plants; insufficient insurance coverage and increases in insurance cost; loss of senior management and key personnel; unauthorised use of Befesa's intellectual property and claims of infringement by Befesa of others' intellectual property; Befesa's ability to generate cash to service its indebtedness changes in business strategy and various other factors. Should one or more of these risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or targeted.

Befesa and its affiliates do not assume any guarantee that the assumptions underlying forward-looking statements are free of errors nor do they accept any responsibility for the future accuracy of the opinions expressed herein or the actual occurrence of the forecasted developments. No representation (express or implied) is made as to, and no reliance should be placed on, any information, including projections, estimates, targets and opinions, contained herein, and no liability whatsoever is accepted as to any errors, omissions or misstatements contained herein or otherwise resulting, directly or indirectly, from the use of this document.

This presentation is intended for information only and should not be treated as investment advice. It is not intended as an offer for sale, or as a solicitation of an offer to purchase or subscribe to, any securities in any jurisdiction. Neither this presentation nor anything contained therein shall form the basis of, or be relied upon in connection with, any commitment or contract whatsoever. This presentation may not, at any time, be reproduced, distributed or published (in whole or in part) without prior written consent of Befesa.

First quarter 2023 figures are unaudited.

This presentation includes Alternative Performance Measures (APM), including EBITDA, EBITDA margin, EBIT, EBIT margin, net debt and capital expenditures which are not measures of liquidity or financial performance under International Financial Reporting Standards (IFRS). EBITDA is defined as operating profit for the period (i.e. EBIT) before the impact of amortisation, depreciation, impairment and provisions. EBITDA margin is defined as EBITDA divided by revenue. EBIT is defined as Operating profit for the year. The Company uses EBIT to monitor its financial return after both operating expenses and a charge representing the cost of usage of both its property, plant and equipment and definite-life intangible assets. EBIT margin is defined as EBIT as a percentage of revenue. These non-IFRS measures should not be considered in isolation or as an alternative to results from operating activities, cash flow from operating, investing or financing activities, or other financial measures of Befesa's results of operations or liquidity derived in accordance with IFRS. Befesa believes that the APM included in this report are useful measures of its performance and liquidity. Other companies, including those in the industry in which Befesa operates, may calculate similarly titled financial measures differently than Befesa does. Because all companies do not calculate these financial measures in the same manner, Befesa's presentation of such financial measures may not be comparable to other similarly titled measures of other companies. These APM are not audited.

01 / Business update

Executive summary

- Revenue increased by 23% to €322m (Q1'22: €261m) driven by the US operations
- Adj. EBITDA at €50.1m, approx. **stable qoq** (Q4'22: €50.7m); **-18% yoy** (Q1'22: €61.1m); lower zinc LME prices, unfavourable 19% higher TC and continued coke inflation
- **Operating cash flow at €13m** (Q1'22: €26m), approx. stable yoy normalised for final Hanover fire insurance proceeds, expected Q2; Cash at €143m provides >€200m liquidity

2023 guidance of €200m to €230m EBITDA, -7% to +7% yoy (2022: €215m);
Proposing **stable dividend of €1.25 per share** for 2023 (2022: €1.25)

Integrating & ramping up zinc refining operations acquired on 30 September;
Continuing efficiency projects to improve earnings going forward, refurbishing Palmerton

Henan plant: Ramping up; Two plants operating in 2023;
Working on the **third province, Guangdong**

Reporting on ESG in June 2023

Q1 business highlights

Steel Dust

- **EAFD throughput:**
-19% yoy to 274 kt, -8% qoq, mainly due to Turkey operations impacted by earthquake (restarted in March), and the US
- **Plant utilisation:** 71%
- **Zinc LME prices:** -13% yoy, -1% qoq
- **Adj. EBITDA:** €37m, -32% yoy, stable qoq

US

- **Integrating & ramping up zinc refining asset** acquired on 30 September
- **Executing efficiency projects,** preparing **Palmerton** plant refurbishment

Alu Salt Slags

- **Salt slags & SPL volumes:**
-6% yoy to 82 kt, stable qoq
- **2nd aluminium alloys:**
+3% yoy to 44 kt, +13% qoq
- **Plant utilisation:**
71% (>90% normalised for Hanover, ramping up)
- **Alu FMB prices:** -12% yoy, -0.5% qoq
- **Adj. EBITDA:** +82% to €14m, +17% qoq

China

- **Henan:** Ramping up operations
- **Operating Jiangsu & Henan plants in 2023**
- **Working on Guangdong** as third province

✓ US Zinc refining asset acquired on 30 Sep 2022; Integration progressing, ramping up operations

Rutherford County, NC

141 kt

- EAF mini mills
- Befesa's EAFD recycling sites
- Befesa's zinc refining plant

x Special High Grade (SHG) zinc production capacity

Zinc refining plant centrally located amongst Befesa's EAFD recycling plants close to the major US EAF steel mini mills

- **Acquired** remaining 93% of zinc refining asset on 30 September 2022 for **\$47m cash** transaction; **65% or \$88m below original purchase option of \$135m**
- **Attractive multiple** of around 5x Adj. EBITDA and at about 1/10th of >\$500m invested
- **Long-term view** around asset potential **unchanged**; **Opportunity to improve performance** of the plant further, especially post current high inflation environment
- **Size of refining plant sufficient to process zinc Waelz oxide (WOX)** of up to 220 kt of all 4 recycling assets at full capacity to pure zinc
- **Largest producer of "green zinc" (SHG)** 100% from recycled materials (WOX) using solvent extraction

Refurbishing Palmerton in 2023/24 to drive efficiencies & increase capacity utilisation by 2026

Sustainable Global Growth
Plan (SGGP), 2022-2027

Megatrends and Befesa's approach by market

EEF steel production

(million tonnes, EAF % share of total steel production)

Primary steel (BOF) consumes 7x more CO₂/t vs. secondary steel (EAF)¹⁾; Decarbonisation favours EAF steel production

Each tonne of steel through EAF vs. BOF → saves 1.5 t CO₂, 1.4 t iron ore, 740 kg coal & 120 kg limestone³⁾

- Approved \$1.2 T infrastructure plan requires more steel output, from '24/25 onwards; Plus, **new announced EAF capacity** driving EAF share >70%
- Shortage of zinc smelting

Befesa approach:

- c.40-50% market share in EAFD; Improving asset efficiency ahead of higher volume 2024/25 onwards → Load assets & maintain share

- Replacing BOF with EAF essential for steelmakers to achieve CO₂ targets; EAF share growing to >50%
- EV transition drives alu demand up & OEMs with preference for recycled alu

Befesa approach:

- c.40-50% market share in EAFD & Alu Salt Slags, and high-cap. utilisation; → Invest in new cap. & maintain share

- Government's masterplan demands doubling EAF share to c.20% by 2030²⁾
- Regulation launched 2016/17; Befesa is 1st mover and market leader in largest & new EAFD market

Befesa approach:

- Continue capacity expansion step by step, monitor recovery from COVID; Planning for 15-20% market share

EV unit sales in Europe¹⁾ (million units)

- EU approved plan to ban sales of vehicles with combustion engines (ICE) by 2035²⁾
- EV unit sales forecasted to grow x5 from c.2 million in 2020 to >10 million by 2030
- EV cars requiring light-weight construction, favouring aluminium demand

1) CRU (Jan 2022)

2) eccee.org (June 2022)

EV requiring higher aluminium content per car to achieve light-weight targets

Average aluminium content per vehicle¹⁾, net weight
(kg per passenger car)

- Average aluminium content per vehicle (passenger cars) has steadily been increasing, from 121 kg/car in 2006 to 193 kg/car in 2022
- Growing and mandatory **electrification** requires **light-weighting** construction and drives **growing demand for aluminium**
- Aluminium content per vehicle expected to **accelerate** to 249 kg/car by 2030

¹⁾ Ducker (Oct 2022)

... driving higher aluminium demand with increased needs for 2nd alu & salt slags recycling

Aluminium demand from Auto¹⁾ in Europe, net weight
(million tonnes)

- Automotive aluminium demand will continue to grow to address light-weighting needs
- OEMs aim to reduce their carbon footprint through use of recycled metal
- Requiring increased production of secondary aluminium and salt slags recycling volumes
- Expecting incremental >300 kt salt slags generation in Europe by 2030
- Befesa's salt slags recycling market share is c.45%; Adding recycling capacity to maintain leadership market share

1) Aluminium demand from passenger cars and light commercial vehicles; Ducker (Oct 2022)

Expansion of 2nd Aluminium –and– New Salt Slags recycling plant

Expansion of 2nd Aluminium

- Expand 2nd aluminium production capacity by c.90 kt at existing site (Bernburg) in line with expected volume
- Permits + construction + ramp-up: 2023-25; Operational by 2026
- Low-risk & medium-return project

New Salt Slags recycling plant

- Invest in a new c.120 kt state-of-the-art salt slags recycling plant in line with incremental secondary aluminium capacity
- Permits + construction + ramp-up: 2023-26; Operational by 2026-27
- Low-risk & medium-return project

Befesa's expansion projects

- Expansion of 2nd Aluminium will increase capacity from existing 205 kt to c.295 kt
- New Salt Slags recycling plant will increase capacity from existing 450 kt to c.570 kt

c.€80-90m total investment; +€15-20m total incremental EBITDA p.a.; Low-risk & medium-return projects

Befesa can self-fund SGGP while keeping leverage c. x2.5 -&- distributing dividends

EBITDA to Cash flow management walk, Illustrative conceptual annual view within SGGP period (€m)

Diversifying Befesa's global footprint ...

1) 2,145 kt Steel Dust capacity excludes 140 kt from Zinc Refining; 2) Normalised for 130 kt Hanover installed capacity due to plant shutdown in 2022

EBITDA

>15yrs

Relationships

>15yrs

Relationships

1) Excluding internal revenue; revenue split is calculated on revenues including internal revenue

2) Including recycling of SPL (a hazardous waste generated in primary aluminium production)

Key milestones

Befesa has grown successfully through organic initiatives and acquisitions

1) Through 51/49 JV with Canadian Silvermet; 2) By acquiring subsequent stakes in the Korean Hankook; 3) Free-float at 100% after Triton's exit on 6 June 2019

Leader in circular economy for >30 years

Environmental regulations

getting stricter and expanding into new geographies; enforcing recycling to drive resource efficiency and lower carbon footprint

Recycling service solutions

critical to the steel and aluminium industries; long-term service relationships with strong barriers to entry and high captive demand

Proven track record

to grow and diversify Befesa's portfolio; developing markets as industry leader & first mover; resilient through the cycles

Global leader

with balanced footprint, close to clients, in Europe, the US & Asia, applying state-of-the-art technology

Favourable mega trends

Decarbonisation, Electric Vehicles (EV), circular economy, drive secondary steel & aluminium demand → requiring Befesa's recycling services

Strong financial backbone

Long-term capital structure & prudent hedging approach enable stable cash flows to fund growth SGGP roadmap

Experienced & stable team

focused on customer service, ESG, profitable and sustainable growth

Shareholder returns

through consistent dividend distribution and high returns on expansion projects

Highly regulated & critical service model

Befesa is the leading environmental services partner in the circular economy of the 2nd steel and aluminium industry by recycling and avoiding the landfilling of c. 1.8 Mt hazardous residues and recovering > 1.5 Mt of new valuable materials

All figures are of the year 2022

Value chains are simplified and only reflect Befesa's core business segments (i.e. Steel Dust; Aluminium Salt Slags):

- Within Steel Dust Recycling Services business segment Befesa manages a Stainless sub-segment (90 kt stainless-steel dust throughput in 2022)

- Within Aluminium Salt Slags Recycling Services business segment Befesa manages a Secondary Aluminium sub-segment (161 kt secondary aluminium alloys produced in 2022)

Proven resilience & growth through cycles

Attractive growth track record with proven margin resilience despite volatile environment - driven by a successful service-focused business model & prudent financial practices

Net leverage	x2.36	x2.14	x2.61	x3.10	x2.38	x2.56

1) 2017, 2018, 2019, 2020 and 2021 are full year actual reported figures audited by external auditors

2) 2017 reported revenue amounted to €724.8m; Revenue of €667.4m is comparable after amendment IFRS 15 impacting non-operating revenue

3) 2017 EBITDA adjusted due to one-off non-recurrent items primarily related to the IPO; 2020 EBITDA adjusted for €3.5m for the UK Salt Slags plant closure;

2021 EBITDA adjusted for €14.0m one-time AZR acquisition costs, and -€6.0m Hanover Salt Slags plant fire impact; 2022 EBITDA adjusted for -€20.3m, mainly driven by Zinc refining acquisition impacts

4) Net profit and total basic earnings/(losses) per share attributable to the ordinary equity holders of Befesa S.A.

5) 2017 EPS impacted by the conversion of the preferred shares carried out in Oct'17 prior to the IPO; The weighted average number of ordinary shares used as the denominator in calculating total basic EPS in 2017

was 25,025 thousand shares vs. 34,067 thousand shares used in 2018-2020; 2021 EPS based on 37,285 weighted average thousand shares after the capital increase of 5,933 thousand new shares to partly fund the AZR acquisition;

2022 EPS based on 39,999 thousand outstanding shares

6) Operating cash flow is after WC change, taxes and interests; pre capex and pre dividend

Q1 2023/22 – Operational data – Steel Dust Recycling Services

	Q1 2022	Q1 2023	yoy change
EA FD throughput (kt)	337.4	273.8	-63.5 / -18.8%
EA FD average capacity utilisation (%)	88.0%	71.4% / 75.1% ¹⁾	-1,657 bps
Waelz oxide (WOX) sold (kt)	103.7	99.8	-3.9 / -3.8%
Zinc LME price (€/t)	€3,337	€2,916	-€421 / -12.6%
Zinc hedging price (€/t)	€2,287	€2,348	+€61 / +2.7%
Zinc blended price ²⁾ (€/t)	€2,533	€2,633	+€99 / +3.9%

1) Normalised for Turkey, stopped in January and February 2023 due to impacts from earthquake

2) Blended rate between hedged prices and average spot prices, weighted by the respective hedged and non-hedged volumes, reflecting the effective price to Befesa

Q1 2023/22 – Operational data – Aluminium Salt Slags Recycling Services

	Q1 2022	Q1 2023	yoy change
Salt slags & SPL treated (kt)	87.5	82.3	-5.2 / -5.9%
Salt slags & SPL avg. capacity utilisation (%)	75.5% / 104.3% ¹⁾	71.0% / 98.1% ¹⁾	-445 bps
Aluminium alloys produced (kt)	42.2	43.7	+1.4 / +3.4%
Secondary alu avg. capacity utilisation (%)	83.6%	86.4%	+284 bps
Aluminium alloy FMB price ²⁾ (€/t)	€2,627	€2,301	-€326 / -12.4%

1) Normalised for Hanover plant shutdown

2) Aluminium scrap and foundry ingots aluminium pressure diecasting ingot DIN226/A380 European Metal Bulletin free market duty paid delivered works

Multi-year trend – Operational data

	2017	2018	2019	2020	2021	2022
EAFD throughput (kt)	661.0	717.1	665.8	687.0	885.7	1,193.8
EAFD average capacity utilisation (%)	84.7%	92.0%	80.7% / 90.1% ¹⁾	83.2%	83.3% ²⁾	76.8%
Waelz oxide (WOX) sold (kt)	217.8	240.9	217.6	239.2	291.0	407.4
Zinc LME price (€/t)	€2,572	€2,468	€2,276	€1,979	€2,544	€3,302
Zinc hedging price (€/t)	€1,876	€2,051	€2,317	€2,239	€2,151	€2,379
Zinc blended price ³⁾ (€/t)	€2,160	€2,168	€2,280	€2,136	€2,275	€2,627
Salt Slags & SPL treated (kt)	509.9	517.0	492.6	444.6	395.0	322.1
Salt Slags & SPL avg. cap. utilisation (%)	96.2%	97.5%	92.9%	83.9% / 86.9% ⁴⁾	84.0%	68.5% / 96.7% ⁴⁾
Alu alloys produced (kt)	184.1	169.3	176.7	174.3	185.8	160.6
Secondary Alu avg. capacity utilisation (%)	89.8%	82.6% / 98.1% ⁵⁾	86.2% / 91.1% ⁶⁾	85.0%	90.6%	78.4%
Aluminium alloy FMB price ⁷⁾ (€/t)	€1,766	€1,715	€1,397	€1,424	€2,112	€2,438

1) Installed capacity and corresponding utilisation rates in 2019 are normalised for the capacity upgrade in Turkey, from 65 kt to 110 kt (plant was shutdown from end of January to mid-August 2019)

2) Installed capacity and corresponding utilisation rates in 2021 are proportional figures based on the actual number of days the China and the US plants (after acquisition) operated in the year

3) Blended rate between hedged prices and average spot prices, weighted by the respective hedged and non-hedged volumes, reflecting the effective price to Befesa

4) Installed capacity and corresponding utilisation rates in 2020 and following years is normalised for the UK plant closure occurred at year-end 2020; in 2022, it is normalised for the Hanover plant shutdown

5) Installed capacity and corresponding utilisation rates in 2018 are normalised for the furnace upgrades in Bilbao (plant was shutdown three months, from 2nd week of June to 3rd week of September), as well as the Barcelona - phase I (plant was shutdown two months, from 4th week of August to 4th week of October)

6) Installed capacity and corresponding utilisation rates in 2019 are normalised for the furnace upgrade in Barcelona - phase II (plant was shutdown three months, from mid-August to mid-November)

7) Aluminium scrap and foundry ingots aluminium pressure diecasting ingot DIN226/A380 European Metal Bulletin free market duty paid delivered works

Top-15 EAF steel producing countries

Top-15 EAF steel producing countries represent close to 90% of global EAF output;
Befesa present in key & growing markets - Europe, Asia/China and the US
