- No military obligation for male candidates.

Description:

Befesa is a global leader in the circular economy, specializing in reducing the environmental impact of industrial waste and residues from the steel and aluminium industries since 1987. With our cutting-edge recycling solutions, we strive to recover valuable materials and reintroduce them into the production process, effectively reducing both environmental impacts and primary production costs.

As a critical environmental services provider to the secondary steel and aluminium industries globally, Befesa operates facilities across eight countries in Europe, Asia, and North America. Our business units, Steel Dust and Aluminium Salt Slags Recycling Services are dedicated to recycling an annual volume of 1.8 million tonnes of industrial residues and hazardous waste. By preventing the landfilling of these hazardous waste streams, Befesa successfully recovers approximately 1.5 million tonnes of valuable new materials, contributing to a sustainable and resource-efficient economy.

We encourage diverse applications from candidates of all backgrounds, as we value and embrace diversity in all its forms, including but not limited to gender, color, age, ethnicity, physical ability, sexual orientation, and religious beliefs. Together, let's shape a sustainable future!

If you are eager to make a difference and be part of a company revolutionizing waste and resource management, apply now to join Befesa.

To apply, please submit your resume and a cover letter highlighting your relevant experience to hasan.ekenel@befesa.com. We look forward to receiving your application.
