Disclaimer

This presentation contains forward-looking statements and information relating to Befesa and its affiliates that are based on the beliefs of its management, including assumptions, opinions and views of Befesa and its affiliates as well as information cited from third party sources. Such statements reflect the current views of Befesa and its affiliates or of such third parties with respect to future events and are subject to risks, uncertainties and assumptions.

Many factors could cause the actual results, performance or achievements of Befesa and its affiliates to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others: changes in general economic, political, governmental and business conditions globally and in the countries in which Befesa and its affiliates do business; changes in interest rates; changes in inflation rates; changes in prices; changes to national and international laws and policies that support industrial waste recycling; legal challenges to regulations, subsidies and incentives that support industrial waste recycling; extensive governmental regulation in a number of different jurisdictions, including stringent environmental regulation; management of exposure to credit, interest rate, exchange rate and commodity price risks; acquisitions or investments in joint ventures with third parties; inability to obtain new sites and expand existing ones; failure to maintain safe work environments; effects of catastrophes, natural disasters, adverse weather conditions, unexpected geological or other physical conditions, or criminal or terrorist acts at one or more of our plants; insufficient insurance coverage and increases in insurance cost; loss of senior management and key personnel; unauthorised use of Befesa's intellectual property and claims of infringement by Befesa of others' intellectual property; Befesa's ability to generate cash to service its indebtedness changes in business strategy and various other factors. Should one or more of these risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or targeted.

Befesa and its affiliates do not assume any guarantee that the assumptions underlying forward-looking statements are free of errors nor do they accept any responsibility for the future accuracy of the opinions expressed herein or the actual occurrence of the forecasted developments. No representation (express or implied) is made as to, and no reliance should be placed on, any information, including projections, estimates, targets and opinions, contained herein, and no liability whatsoever is accepted as to any errors, omissions or misstatements contained herein or otherwise resulting, directly or indirectly, from the use of this document.

This presentation is intended for information only and should not be treated as investment advice. It is not intended as an offer for sale, or as a solicitation of an offer to purchase or subscribe to, any securities in any jurisdiction. Neither this presentation nor anything contained therein shall form the basis of, or be relied upon in connection with, any commitment or contract whatsoever. This presentation may not, at any time, be reproduced, distributed or published (in whole or in part) without prior written consent of Befesa.

Third quarter and first nine-month period 2023 figures are unaudited.

This presentation includes Alternative Performance Measures (APM), including EBITDA, EBITDA margin, EBIT, EBIT margin, net debt and capital expenditures which are not measures of liquidity or financial performance under International Financial Reporting Standards (IFRS). EBITDA is defined as operating profit for the period (i.e. EBIT) before the impact of amortisation, depreciation, impairment and provisions. EBITDA margin is defined as EBITDA divided by revenue. EBIT is defined as Operating profit for the year. The Company uses EBIT to monitor its financial return after both operating expenses and a charge representing the cost of usage of both its property, plant and equipment and definite-life intangible assets. EBIT margin is defined as EBIT as a percentage of revenue. These non-IFRS measures should not be considered in isolation or as an alternative to results from operating activities, cash flow from operating, investing or financing activities, or other financial measures of Befesa's results of operations or liquidity derived in accordance with IFRS. Befesa believes that the APM included in this report are useful measures of its performance and liquidity. Other companies, including those in the industry in which Befesa operates, may calculate similarly titled financial measures differently than Befesa does. Because all companies do not calculate these financial measures in the same manner, Befesa's presentation of such financial measures may not be comparable to other similarly titled measures of other companies. These APM are not audited.

01 / Business update

Executive summary of Q3 2023

Revenue
€289 million

+8% yoy

- Lower zinc and alu prices
- + US zinc refining operations

Adjusted EBITDA
€42 million

-8% yoy

- Lower zinc and alu prices
- Unfavourable zinc TC
- + Higher zinc hedging price
- + Lower energy prices
- + Productivity and savings

Operating cash flow
€22 million

+51% yoy

- Lower earnings
- Higher interests
- + WC and extraordinary effects

Growth

- Zinc refining: focused on improving profitability gradually
- Palmerton refurbishment: on track to capture growth in 2025

- Jiangsu / Henan: utilisation affected by real estate crisis
- Guangdong: cautiously progressing in third province

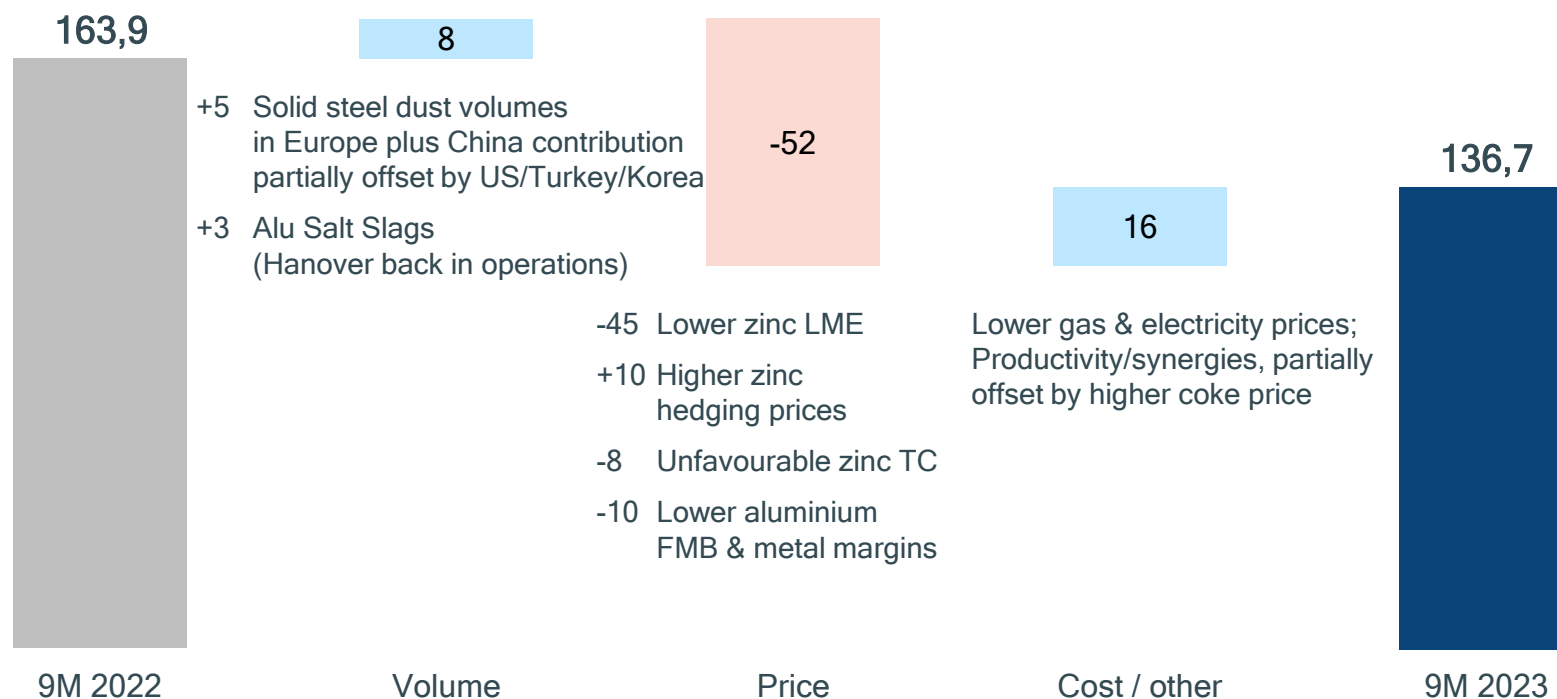

Outlook

- **2023:** Expecting Q4 similar to Q3; Full-year adjusted EBITDA around €180m
- **2024:** Expecting to return to the growth path; Pressures faced in '23 to revert in '24
- **Mid-term:** Decarbonisation trend driving mid-term growth

Consolidated key financials

Total adjusted EBITDA decreased by 17% yoy to €137m in 9M 2023, mainly due to lower zinc and alu prices, unfavourable TC, and higher coke price, partially offset by volume, better hedges and synergies

Adjusted EBITDA¹ 9M 2022 to 9M 2023

¹ 9M 2023: €64.5m reported Total EBIT + €61.0m D&A = €125.5m reported Total EBITDA + €11.2m adjustments = €136.7m adjusted Total EBITDA
9M 2022: €126.4m reported Total EBIT + €54.8m D&A = €181.1m reported Total EBITDA - €17.3m adjustments = €163.9m adjusted Total EBITDA

Key volume drivers and impact on Befesa 9M 2023

Key volume drivers in 9M

% vs prior year

Crude steel production

Car sales¹

Befesa's volumes in 9M

- Strong performance in Europe
- EAF steel dust throughput grew yoy at solid levels despite the challenging steel production
- Aluminium salt slags volumes grew yoy mainly driven by Hanover back in operations

- EAF steel dust volumes decreased yoy, as expected; operational performance improving gradually
- Utilisation levels in the 70's% level

- EAF steel dust throughput decreased yoy mainly impacted by the earthquake in Q1 in Turkey; Plant running at normal levels

- EAF steel dust throughput increased yoy but lower than expected, affected by the real estate crisis
- Plant utilisation of around 70% in Jiangsu, 30% in Henan

¹ Sales of new passenger cars for US and China; registrations of new passenger cars for EU; US and EU figures as of September YTD, China as of August YTD

The current decrease in zinc prices is one of the largest seen in the last 15 years

¹ London Metal Exchange (LME) zinc daily cash settlement prices, US\$ per tonne

² Morgan Stanley Research

2023 impacted by high TC in a very volatile zinc price environment

Zinc LME¹

- Zinc LME has decreased by 37% in 2023, from c. \$3,500/t peak to c. \$2,200/t trough
- 9M 2023 averaged at \$2,699/t (€2,493/t), around the last 5-/10- year average level but c. \$950/t or €930/t below the same period of 2022 (9M 2022: \$3,645/t or €3,422/t)
- Each \$100/t zinc LME price variation implies c. €8m FY EBITDA

Zinc treatment charges (TC)

- TC for 2023 was settled at \$274/t, the second highest level after the \$300/t peak in 2008 & 2020; TC spot decreased during 2023 to current c. \$150/t
- When TC was settled, zinc LME was at c. \$3,000/t before decreasing to \$2,400–2,500 (Q2/Q3 2023)
- TC as % of \$LME increased from 9% (March/April 2023) to 11% (Q2/Q3 2023)
- Each \$10/t TC variation implies €2–3m FY EBITDA

¹ London Metal Exchange (LME) zinc daily cash settlement prices, US\$ per tonne

Coke price remains high, despite slightly moderating in Q3; Gas price stabilised at 2021 level

Befesa's energy price evolution by source

Coke

- After reaching an all-time-high level in Q1/Q2 2023, Befesa's coke price slightly moderated in Q3 (-4% vs. Q2; -4% yoy)
- However, 9M 2023 average price is still around 85% above the 2019–2021 average levels
- New contracts for coke supply in Europe around €130/t

Gas

- Prices stabilised in Q3 (flat versus Q2)
- YTD trailing around the 2021 average level

Electricity

- Prices increased in Q3 (+25% vs. Q2), but YTD still below the 2022 average level

Befesa's hedging strategy provides price visibility and lowers impact from zinc price volatility

- Befesa's hedging strategy unchanged
 - 1–3 years forward
 - Targeting 60% to 75% of zinc equivalent volume
 - Befesa providing no collateral
- Befesa's hedging strategy has proven **successful** providing **price visibility** and **lowering impact** from zinc price volatility
- Befesa with 60–75% of its zinc exposure **hedged** up to July 2025
- For the **unhedged portion**: **each \$100/t change** in zinc LME price represents c. €8m impact on FY EBITDA

¹ London Metal Exchange (LME) zinc daily cash settlement prices

² Zinc blended prices are averages computed based on the monthly effective LME zinc and hedging prices weighted with the respective hedged and non-hedged volumes

³ Assumes FX €//\$ of 1.10 for 2023, 2024, and 2025

Cash flow, net debt & leverage

Cash on hand at €81m providing >€150m liquidity; Net debt increased to €633m driven by lower earnings; Net leverage of x3.38

Adjusted EBITDA to Total cash flow 9M 2023

		30.09.2022	31.12.2022	30.09.2023	change yoy	change vs year end 2022
LTM Adjusted EBITDA	€m	224.6	214.6	187.5	-16.5%	-12.6%
LTM Operating cash flow	€m	122.3	137.3	122.7	+0.3%	-10.7%
Gross debt	€m	713.4	710.8	714.3	+0.1%	+0.5%
Cash on hand	€m	139.1	161.8	80.8	-41.9%	-50.0%
Net debt	€m	574.2	549.0	633.4	+10.3%	+15.4%
Net leverage		x2.56	x2.56	x3.38		

¹ Includes investments required to maintain or replace assets as well as those related to productivity, compliance and IT

² Mainly includes cash bank inflows/outflows from bank borrowings and other liabilities, as well as the effect of foreign exchange rate changes on cash

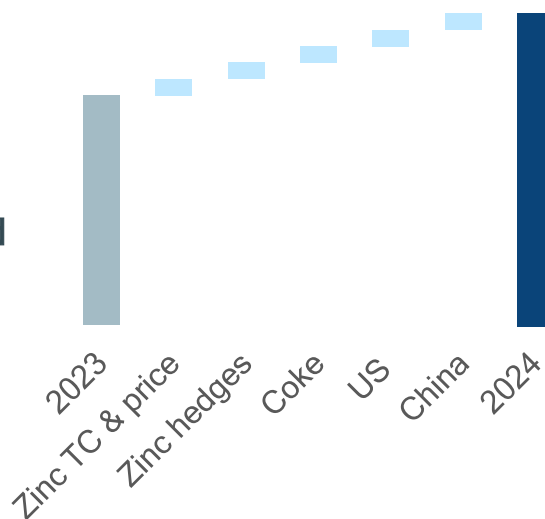

Outlook

Full year 2023 challenging

- Current **macro and market specific challenges** caused a combination of **temporary pressures**, e.g. high TC, low zinc prices close to C90, all-time-high coke prices, lower than expected steel dust volumes in China
- **Q4** expected to be **in line with Q3** based on similar market conditions
- **Full year adjusted EBITDA for 2023** expected at around **€180m**, (previously: €200–€230m, which had been forecast on the basis of higher zinc prices)

Return to growth path expected in 2024

- **Pressures** faced in 2023 **should revert in 2024** due to the temporary nature of the external pressures
- Growth in 2024 does not depend on global macro-economic improvement

Positive mid-term outlook intact

Favourable decarbonisation and EV macrotrends

Globally balanced in core businesses

€125-€155m additional EBITDA

Low risks & high returns

Rigorous execution and monitoring timing

Decarbonisation driving EAF steel production in Befesa's key markets

EAF steel production

■ 2022 ■ 2030e

Decarbonisation and EV driving aluminium market growth in Europe

EV unit sales in Europe¹
million units

Alu content per vehicle²
kg per passenger car

Auto alu demand in Europe²
million tonnes

- **Decarbonisation** trend **drives** transition to electric vehicles (EV)
- EV requiring **higher aluminium content per car** to achieve light-weight targets
- Driving **higher aluminium demand** in Europe and increased **need for secondary aluminium and salt slags recycling capacity**

¹ CRU (January 2022)

² Ducker (October 2022)

Well defined growth roadmap in execution towards 2027

Growth projects	<ul style="list-style-type: none"> Steel Dust Alu Salt Slags 	Indicative timing & progress		Capex €m	EBITDA run-rate €m
		2023	2027e		
	1 Zinc refining ✓			110–120	35–45
	2 Palmerton refurbishment				
	3 China III, 1 st kiln Guangdong			115–125	30–35
	4 China IV, 2 nd kiln Jiangsu				
	5 China V, 2 nd kiln Henan				
	6 EAFD recycling plant				
	7 WOX washing plant				
	8 2 nd Aluminium expansion			80–90	15–20
	9 Salt Slags recycling plant				
<div>Completed</div> <div>To go</div>				410–450	110–135

Palmerton plant refurbishment progressing well to seize market growth in 2025

Plant overview

- 2 kilns with c. 163 kt → 220 kt (post-refurbishment) EAF steel dust recycling capacity
- Producing **WOX** as a marketable product

Indicative timing and status

- ✓ EPC contract signed
- > Works ongoing

Timing confirmed:

Phase I: completed by Q3 2024

Phase II: completed by beginning of 2025

Key financials

- Capex: €60–70 million
- EBITDA run-rate: €25–30 million
- Payback: 2–3 years; IRR: >30%

Growth opportunity in China is attractive and Befesa's plan remains unchanged, despite current market challenges

Challenging market environment

- YTD steel output still up yoy driven by BOF; production cuts likely in Q4 to meet control policies
- EAF mills (typically privately-owned vs state-owned BOF) running at 50% (80% pre-COVID) due to real estate crisis, reducing steel dust generation

EAF growth drivers in China remain attractive

EAF penetration growing

- Around 20% targeted by 2030
- >60 Mt new EAF capacity announced / underway

Strict environmental regulation

- Launched in 2016/17
- Getting stricter but following a two-speed approach

First mover advantage

- Befesa commercial office opened in 2008
- Jiangsu started in 2021, Henan in 2023

Befesa's growth plan in China remains unchanged

- Cautiously progressing in Guangdong province: capex deployment likely in 2024/25 subject to ongoing negotiations with local steelmakers
- Once run-rate levels reached in existing sites, develop second 110 kt kilns (Jiangsu & Guangdong)

Cautiously progressing in Guangdong province

Around 126 million people (2022),
10–15% of China

GDP: US\$1.9 T (2022), Top 10 global;
5% growth target for 2023;
5–6% p.a. growth (2020–2035e)

Largest auto production in China

Top 5 EAF steelmaking clusters in
China, with 200–400 kt EAF dust p.a.

Plant overview

- 1 kiln with 110 kt EAF steel dust recycling capacity
- Option for expansion on site:
2 additional kilns x 110 kt = +220 kt capacity

Indicative timing and status

- ✓ Investment agreement signed Q1 2023
 - ✓ Land lot assigned Q1 2023
 - Levelling lot; Preparing basic engineering
 - Long-term supply agreements ongoing
- Start of construction to be monitored during 2024

Key financials

- Capex: €45–50 million
- EBITDA run-rate: €8–12 million
- Payback: 4–5 years; IRR: >20%

Aluminium salt slags recycling in the US might become a real opportunity sooner than expected

- The **secondary aluminium industry** is **growing fast in the US**, similarly to Europe
- Two US aluminium producers have approached Befesa to provide a recycling solution for their aluminium residues
- US environmental authorities are starting to move **towards banning the landfilling of aluminium salt slags**, similarly to Europe
- The US is a large mature market, very similar to Europe, of **1 Mt of salt slags** produced p.a.
- Befesa **analysing options** to adapt its aluminium salt slags business model to enter the US market

Megatrends and Befesa's approach by market

EAF steel production

million tonnes, EAF % share of total steel production

Primary steel (BOF) consumes 7x more CO₂/t vs. secondary steel (EAF)¹; Decarbonisation favours EAF steel production

Each tonne of steel through EAF vs. BOF → saves 1.5 t CO₂, 1.4 t iron ore, 740 kg coal & 120 kg limestone³

- Approved \$1.2 T infrastructure plan requires more steel output, from '24/25 onwards; Plus, **new announced EAF capacity** driving EAF share >70%
- **Shortage of zinc smelting**

Befesa approach:

- c. 40–50% market share in EAFD; **Improving asset efficiency ahead of higher volume 2024/25 onwards**
→ **Load assets & maintain share**

- Replacing BOF with EAF essential for steelmakers to achieve CO₂ targets; EAF share growing to >50%
- EV transition drives alu demand up & OEMs with preference for recycled alu

Befesa approach:

- c.40-50% market share in EAFD & Alu Salt Slags, and high-cap. utilisation;
→ Invest in new cap. & maintain share

- Government's masterplan demands doubling EAF share to c.20% by 2030²
- Regulation launched 2016/17; **Befesa is 1st mover and market leader** in largest & new EAFD market

Befesa approach:

- Continue capacity **expansion step by step**, monitor recovery from COVID; Planning for **15-20% market share**

SGGP – Steel Dust – US

EAFD generation in the US expected to increase >0.3 Mt by 2030;
Befesa to fully utilise existing c. 620 kt annual installed capacity

EAF steel production

million tonnes, EAF % of total crude steel output

\$1.2 T infrastructure plan
driving higher steel volume
and
decarbonisation driving
EAF share up

EAFD generation

million tonnes

Befesa's expansion projects

- ✓ **Acquisition of Zinc refining asset** on 30 September 2022 for \$47m cash transaction
- **Executing capacity utilisation increase** in 2023–26;
 - Targeting c. **200 kt incremental throughput** to fully utilise existing c. 620 kt nameplate capacity
 - **Refurbishing** Palmerton site in 2023–24, to be ready for expected volume increase in '24–26 onwards
 - Efficiencies and refurbishment vital to achieve **throughput, energy and CO₂ intensity improvements**

c. €110–120m total investment; c. €35–45m total incremental EBITDA p.a.; Low-risk & high-return projects

¹ Macquarie (June 2022)

Turnaround of zinc refining plant on track; Expecting positive EBITDA in 2024

Plant overview

- #1 producer of “green zinc” (SHG zinc), 100% from recycled materials (WOX)
- 141 kt SHG zinc total capacity
- Plant size can process up to 220 kt WOX from Befesa’s recycling plants in the US

Turnaround in a 3-step process

- ✓ 1. Quality improvement
 - High quality needed; Standard SHG specifications to avoid discounts from customers
- ✓ 2. Utilisation increase
 - Breakeven around 83–90%
- 3. Cost reduction
 - Focus on reducing fixed cost

Key financials

- Capex: €50 million
- EBITDA run-rate: €10–15 million (2023: breakeven; 2024: €0–5 million)
- Payback: 4–5 years; IRR: >15%

Palmerton plant refurbishment progressing well to seize market growth in 2025

Plant overview

- 2 kilns with c. 163 kt → 220 kt (post-refurbishment) EAF steel dust recycling capacity
- Producing **WOX** as a marketable product

Indicative timing and status

Befesa approach:

- c. 40-50% market share in EAFD & Alu Salt Slags, and high-cap. utilisation; → Invest in new cap. & maintain share

- Government's masterplan demands doubling EAF share to c.20% by 2030²
- Regulation launched 2016/17; Befesa is 1st mover and market leader in largest & new EAFD market

Befesa approach:

- Continue capacity expansion step by step, monitor recovery from COVID; Planning for 15-20% market share

c. 350 kt EAFD

Sources: ArcelorMittal Annual Report 2021; S&P Global (Jan 2022); Salzgitter Roadshow Presentation (March 2022); voestalpine's Consolidated Financial Statements 2021/22

Adding new EAFD recycling capacity and WOX washing expansion

c. €105–115m total investment; c. €30–35m total incremental EBITDA p.a.; Low-risk & high-return projects

New EAFD recycling plant

- Grow with EAFD addressable market and invest in a **new 140–160 kt state-of-the-art EAFD plant**
- Construction + ramp-up in 2025–26; **Operational by 2026–27**
- **Low-risk and high-return project**

WOX washing expansion

- **Expand WOX washing capacity** at Gravelines, France, in line with incremental European EAFD capacity
- Construction + ramp-up in 2025–26; **Operational by 2026–27**
- Investment required to enable EAFD capacity growth

Aluminium Salt Slags Recycling Services – Decarbonisation trend drives transition to EV

Automotive industry switching from combustion to Electric Vehicles (EV)

EV unit sales in Europe¹
million units

- EU approved plan to ban sales of vehicles with combustion engines (ICE) by 2035²
- EV unit sales forecasted to grow x5 from c. 2 million in 2020 to >10 million by 2030
- EV cars requiring light-weight construction, favouring aluminium demand

¹ CRU (January 2022).
² eceee.org (June 2022).

EV requiring higher aluminium content per car to achieve light-weight targets

Average aluminium content per vehicle¹
net weight, kg per passenger car

- Average aluminium content per vehicle (passenger cars) has steadily been increasing, from 121 kg/car in 2006 to 193 kg/car in 2022
- Growing and mandatory **electrification** requires **light-weighting** construction and drives **growing demand for aluminium**
- Aluminium content per vehicle expected to **accelerate** to 249 kg/car by 2030

¹ Ducker (October 2022)

... driving higher aluminium demand with increased needs for 2nd alu & salt slags recycling

Aluminium demand from Auto in Europe¹ net weight, million tonnes

- Automotive aluminium demand will continue to grow to address light-weighting needs
- OEMs aim to reduce their carbon footprint through use of recycled metal
- Requiring increased production of secondary aluminium and salt slags recycling volumes
- Expecting incremental >300 kt salt slags generation in Europe by 2030
- Befesa's salt slags recycling market share is c. 45%; **Adding recycling capacity to maintain leadership market share**

¹ Aluminium demand from passenger cars and light commercial vehicles; Ducker (October 2022)

Expansion of 2nd Aluminium and New Salt Slags recycling plant

Expansion of 2nd Aluminium

- Expand 2nd aluminium production capacity by c. 90 kt at existing site (Bernburg) in line with expected volume
- Permits + construction + ramp-up: 2023–25; Operational by 2026
- Low-risk & medium-return project

New Salt Slags recycling plant

- Invest in a new c. 120 kt state-of-the-art salt slags recycling plant in line with incremental secondary aluminium capacity
- Permits + construction + ramp-up: 2023–26; Operational by 2026–27
- Low-risk & medium-return project

Befesa's expansion projects

- Expansion of 2nd Aluminium will increase capacity from existing 205 kt to c. 295 kt
 - New Salt Slags recycling plant will increase capacity from existing 450 kt to c. 570 kt
- c. €80–90m total investment; +€15–20m total incremental EBITDA p.a.; Low-risk & medium-return projects

Befesa can self-fund SGGP while keeping leverage c. x2.5 and distributing dividends

04 / Befesa overview

Environmental services for the Steel & Alu industries

- 25 plants globally; >1,800 employees
- #1 globally in **Steel Dust Recycling** and #1 in Europe **Alu Salt Slags Recycling Services**
- €215m EBITDA in 2022; Earnings split: c. 80% Steel / 20% Alu services
- Dividend distribution: **40-50% of net profit**; €50m or €1.25/share in July 2023 for 2022
- 2017 IPO Frankfurt Stock Exchange → 2018 SDAX → 2021 MDAX

- **100% circular economy**: Recycling 2 Mt hazardous residues from secondary steel (EAF) and aluminium industries
- **Extracting zinc, aluminium, salt** and selling those back to the market **preventing the use of virgin resources**
- Producing iron oxide and aluminium oxide as useful industrial filler materials

Growth

- **Environmental regulation** → Befesa 1st mover as market leader:
 2010 Turkey,  2012 South Korea,  2017 China
- **Acquisition**:
 2021 Steel Dust recycling assets (AZR); 2022 Zinc refining asset (AZP)
- **Market and customers growth**:
 Decarbonisation drives EAF vs. BOF with c. 1.5t CO₂ less per ton of steel
 EV accelerates Alu growth (c. 120kg '06 → 190kg '22 → 250kg '30 alu per car)

Befesa at a glance

Key milestones

Befesa has grown successfully through organic initiatives and acquisitions

1 Through 51/49 JV with Canadian Silvermet
54 Business Update - Post Q3 2023 Earnings

2 By acquiring subsequent stakes in the Korean Hankook

3 Free-float at 100% after Triton's exit on 6 June 2019

Leader in circular economy for >30 years

Environmental regulations

getting stricter and expanding into new geographies; enforcing recycling to drive resource efficiency and lower carbon footprint

Recycling service solutions

critical to the steel and aluminium industries; long-term service relationships with strong barriers to entry and high captive demand

Proven track record

to grow and diversify Befesa's portfolio; developing markets as industry leader & first mover; resilient through the cycles

Global leader

with balanced footprint, close to clients, in Europe, the US & Asia, applying state-of-the-art technology

Favourable mega trends

Decarbonisation, Electric Vehicles (EV), circular economy, drive secondary steel & aluminium demand → requiring Befesa's recycling services

Strong financial backbone

Long-term capital structure & prudent hedging approach enable stable cash flows to fund growth SGGP roadmap

Experienced & stable team

focused on customer service, ESG, profitable and sustainable growth

Shareholder returns

through consistent dividend distribution and high returns on expansion projects

Highly regulated and critical service model

Befesa is the leading environmental services partner in the circular economy of the 2nd steel and aluminium industry by recycling and avoiding the landfilling of c. 1.8 Mt hazardous residues and recovering c. 1.5 Mt of new valuable materials

All figures are of the year 2022

Value chains are simplified and only reflect Befesa's core business segments (i.e. Steel Dust; Aluminium Salt Slags):

- Within Steel Dust Recycling Services business segment Befesa manages a Stainless sub-segment (90 kt stainless-steel dust throughput in 2022)

- Within Aluminium Salt Slags Recycling Services business segment Befesa manages a Secondary Aluminium sub-segment (161 kt secondary aluminium alloys produced in 2022)

Proven resilience & growth through cycles

Attractive growth track record with proven margin resilience despite volatile environment - driven by a successful service-focused business model & prudent financial practices
